If the assignment is set to not allow you to submit work after the due date, it means you must complete the assignment before then as no submissions will be allowed regardless of the assignment's allowed attempts or time limit. Anything you're currently working on or have saved previously will be automatically submitted after the due date. If you start an assignment with a time limit that would exceed the due date, the time limit gets shortened. The timer will instead show the time left until the due date, after which your work will be submitted.

If the assignment is set to not allow new attempts after the due date, you will be allowed to submit your work late, but you will not be able to start a new attempt, which is especially important for tests. You will be able to use the full time limit of an attempt no matter what, even if the due date is within that time frame.
