

Edit: 30th August 2025

I am returning editing privileges again. Since I'm sure, some of you appreciate there's a place you can quickly add notes of your favourite chapters. BUT!!!!!! DO NOT DELETE PAGES!!!! I have backed up files to try and counteract it again in the future but Do Not Be Malicious. A Lot of Progress Was Definitely Lost With That Deleted Page. Please please please be more considerate. I do not want to completely lock down this document entirely. Abide by the rules and only edit what you need.

Edit: 25th August 2025

Ok, I've revoked privileges so only I could edit this for now. Please bear with me as I try to fix this mess, apologies.

Update: Due to a whole page somehow getting deleted, I am no longer letting Anyone edit this document (for the time being - depends on my decision later). For now, I will let people Comment so they can suggest edits and any information they want to add.

Edit: 26th March 2025

Hey ladarads, this copy was getting really, reaaaaallly, long, and was taking a while to load and that would be a pain to edit. So to make it easier, I split it into other documents (links below), which should be more manageable. I would also like to introduce more rules (also below), which I would like everyone else to try to adhere to so we can make this more user-friendly for everyone. Any suggestions, please list down below and I will consider.

Edit: 19th May 2024

Hey guys, so the first version got completely blocked. Unfortunately, I lost the password for the Google Account ages ago, so I cannot go back into the account and see what's wrong in the back. But fear not, because I recently copy-pasted it to make some new changes (which I'm still in the middle of), which hopefully should make navigation easier. Well, anyway, the worst is averted, but all is well I guess. Peace.

Important/memorable plot points

<A list of chapters where particularly important scenes or events occur.>

Rules:

- No bad language or attack on anyone of any kind. Keep it nice.

- Although you may add your thoughts, please try to keep it factually correct.
- Do not randomly start deleting tabs or anything - **YOU MAY ONLY ADD OR EDIT!!! I DO NOT WANT TO FIX 500 CHAPTERS WORTH OF DELETED CONTENT AGAIN!!**
- Try and keep names consistent - although it would be appreciated to use Library Key Translation's TL, we do understand some terms have either been around so long (such as Euishin instead of Uisin) or we haven't gotten far enough, so just go with majority. It just makes it easier to search for terms, especially when using Ctrl+F
- Similarly, avoid acronyms if you can, such as AD, JSH and so on

Chapters:

Links have all been sorted. Just give a shout on Discord if anything seems wrong. Please refer to the most recent Update before doing so (at the top of the page).
