Product AR9100-8 ~ Archoil Friction Modifier 8oz Information

Patented Potassium Nanoborate lubrication technology dramatically reduces operating friction protecting equipment from wear, extending operating life, and reducing operating energy requirements.
Archoil's revolutionary new potassium Nanoborate formulation represents the 2nd generation in boron tribology with its unique ability to reduce boron size down to the more efficient "nano" level and deliver it in a naturally occurring fatty acid ester matrix carrier; specially formulated to facilitate the migration of the protective boron

nanoparticles to surface level.

Product Features

- Reduces surface friction 60-80%
- Increases fuel efficiency & Reduces fuel system wear up to 90%
- Increases horsepower
- Reduces operating temperatures up to 30%
- Cleans out pre-existing carbon and varnish build up plus much more
