May 2014 SAT

We should Vote on Answers

Will the curve be harsh or lenient?

this is fudging ridiculous

CHAT: https://docs.google.com/document/d/1pmGMfJJDwd3QXa0Ti4BF6pgf00Rg-ZAWntm7I9TDqxA/edit?usp=sharing

Write down questions if you remember

Essay

Should a true leader follow his or her own conviction or submit to public opnion?
Follow conviction (+5) Submit to public opinion (+8)

What if i say Charles Darwin is a leader in biology field? uh..sure :)...kinda….

CR

Sentence Completion

1. (Small) stature of plants... inhibiting…. (constant), often buffeting winds (wasn't it smth like "big" stature of plants inhibiting "destructive," often buffeting winds?)--it wouldn't make sense if the plants are small and the stop the winds. i thought it was the choice with big as well. I'm pretty sure it's big/destructive. Change? i think it was small and constant only the plant has to be small .. it's kinda weird but i learned it in biology that plants that live in windy areas are short for evolutionary purposes looool
2. Follow
3. Inspire, disciple
4. Uncouth
5. Economist (Alarmist) (Foresaw) as he looked for problems
6. Egalitarian

7. Histrionic
8. Luminescent-> experimental
9. Mundane
10. Fortuitous
11. Precocious
12. Duplicitous
13. Verbatim
14. Superfluity, Exemplary
15. Intrepid
16. Rebuffed… Vindicated
17. Genealogy -> I think this one is experimental one)
18. enticing(+2) :) -> EXPERIMENTAL ? nope
19. there was also a vocab question about the sickle cell anemia and malaria...protection against….? it might be experimental
20. rare . .. combative (+3) - the question about not taking sides-
21.

how many of the above vocab questions are experimental?? - there were 8 experimental vocabs
people think of more vocab questions!!!

Which short pasages were the experimental ones??? tough guy (I DONT THINK SO

The artist from Virginia BEST ONE :) agreed

- Broadcast viewer, television reporter (+5)
- The ladies disliked the man for his reticence about the artist(+2)
  or his recent air of self-importance (+6)
- Material = information (+5)
- Developed = made clear (+4)
- Superficially friendly but aloof (+4)
- Abstract sculpture (+5)
- Goes against common and proprietary sense (+4)
- England furniture = high quality and cost (+5)
- She doesn't understand her artistic notions (+4)
- how the artist personalized her environment (+5)
- change in attitude (+5) ….. compromise (+1) ….. forced realign of interest

Contemporary Media Visionary

Underwent profound changes as a result of Johnson's work (+5)

- used demographics(+1)
- appealed to various ethnic/consumer groups?
- Is the second question sth like paricularlly focus on certain customer ? (+3)

Growing Corn

- Challenge a common assumption about farming (+5)
- It shifts the focus (+6)

Migration

- They migrate despite seasonal changes (+7) or thicken their fur (+1)
- shows the author's personal reaction to an occurrence (+7)
- window of light = short period of hospitable weather (+6)
- A good starting point (+6) or dramatic.. sth / lifelong sth (+1)
- Author's reaction : jovial(+3) or awestruck(+7)

Miyamoto - Japanese game

- Resourceful and Imaginative (+7) / creative and defiant (+2)
- Gratitude for past experiences during childhood (+8)
- Origins of the creative approach (+6) what about unsual upbring?
- To emphasize the importance of the event (+7) What was the question here plz?
- Less opportunity to roam around one's surrounding (+7)
- Something about being created in technology Miyamato's games later in life simulated electronically for many others(+5)
- They didn't have models to draw upon(+7)... Used experience outdoors(+3) .. i wrote they didn't have technology .. I took the models quite literally; I think I am wrong, but I think outdoors is a viable answer

- Was it striking progression for the last one (or one of the last ones)? ,it was striking progression.
- yeahh i think so ...i thought it was catalystic something cuz it emphasized that it happened quickly
- 1 vote for striking progression! (+8)
- I put anomalous undertaking or sth-What was the question?
- there was also a question about from a vacant eye something to something..what's the answer for that? reality vs. perception? → i put sth about opposing common belief.. not sure. I put reality vs.percetion (+1)
- There was also a question about the last paragraph's meaning something like "wish/desire"?????

Tough Guy & Newton

- fucking objective, contextual reality made me feel like i was reading TOK essays.
-was this newtonian one experimental? yes
-Experimental
-THIS PASSAGE BLEW MY MIND. Thank god it was experimental!
-I figure it was the dummy beforehand :)

MINE IS MATH EXPERIMENTAL BUT I STILL ENCOUNTERED THE TOUGH GUY PASSAGE??
ok maybe it's not experimental then..but the contextual reality is def experimental
YEAH IT IS :)

Tough guy→ tough guy one shouldn't be experimental because the oen with Newtonian theory should be. - tough guy was a short passage
Are we talking about the short peer passages about acting? I'm sure it's not experimental because I met 4 MATH sections
1) inauthentic wait, what was tha passage about tough guy??about what?? it was a short double passage, how acting should be sincere, not just about trying to impress the audience

Herodotus -

- storyteller (+7)
- Explain a method that Herodotus used (+5)
- Many historians rely on his work(+2)
- Independent seliability of sources
- 15. historians rely on Herodotus's work? -> YES, yes I**NDEPENDENT** sources can conflict with each other (+4)
    - Question: was the answer independent sources can conflict with one another? after reading that last portion of the passage
- Fabricated evidence (+7)- for what question?
- Overly credulous (+6)
- Maximum (+8)
- Showing unr (what was this question?)

- untrustworthy (+3) - what's the question for this?
- was there a question with the answer partisan??? yes but thats not the answer what is the answer?? i remember it was choice c…:/ was that one untrustworthy? i think so not sure though i think it's untrustworthy
- there was a question about reading a portion of the passage that talked about how some ancient people consider material 3 generations old to be the maximum..and this implies that their standard for telling history is higher ? was the answer? (+1)

What was the question that asked about what both authors would agree with?

Math

hey man, here are some questions;
1)There was a task to find the difference between the 50th and 45th terms of arithmetic progression. Suppose, the answer was 20. Who agrees? YES, yes (+3)
2)And the awful kind of diagram with population of cities. Smth like find the number closest to the half of population of city p? 1980 yuppy!(+3)
3)The question in which the digit of tenth should be less than that of the units. smth like combination stuff, i skipped it (it was 36)
8+7+6+5+4+3+2+1 i guess (+3)
4)there also was one with trapezium. and we had to find the perimeter of the triangle inside of it. i got 13+13+24=50. Who agrees? (+3)yuppi!
5)Question about water galloons. Smth about taxes. 80-20(taxes)=60/1.5=40, the answer is 40000. (+3)
6)Function g(x)=f(x)+4 i suppose. and we had to find the x in which g(x)=0
answer: 5 (+4)
7)x(a little circle with a dot inside))y=/x^2-y^2/+2 i think. x and y are real numbers and the x=0 y=0 ans: 2, NOPE i'm afraid the answer is 4< **agreed.**, since 0 is not a real number (((crying) … what?! 0 is a real number. Really??omg thanks GOD!!i thought i made a mistake)) 0 is a real number yess all number are real number except sqrt-1 and infinity hahha:) anyway could x any y equal the same or they must be diffrent The could both equal 0, i think. it was not condi d okay wohoo so the answer is 2. Plus whoo agreees (+3)
8)There also was a question with progression in which each following term equals to the average of previous two. I dont remember the task, but the answer is 8th.-Yeah Put plusses who agrees :)
(+6)
yeah, we had to find out the first term that isn't an integer
there was also a question about the slope and the answer was 0..the quadrant question (+3)

I said that the slope is not defined :/ cuz if slope is 0 then it is not really on the second(it should be 4th) and third quadrants.. isnt it? **no it's def 0 how is it 0? 0 or not defined?i am confused**
Look, the graph is a line and it lies in 3-4 quadrants. slope=(y-y0)/(x-x0) for a line, y is a constant=>y=y0 => the numerator is always 0 => slope is 0.(+2)
The question didn't tell if the 'other two points' have y value at -2 as well - so we can't say the slope is 0 for sure. ALL y have value of -2

9)Question about heights of cone. I remember choosing 6. (+2) yes :)
10)a HUGE circle with 3 small ones inside. Who remembers?
it was calculating perimeter of the shaded part >that was pie d (+6)
11)There was smth about angle i suppose. The answer for it is 126. There were a lot of x's in the task.(+3)
12)And also a question about rectangular with vertices according to the clock bla bla…i chose that the diagonal AC>AB ? than one of the sides(think, it was BD).Shouldnt it be AB>BC coz the length must be greater than width? **They didnt call the type of a rectangular, it could also be a square. then the width of a square=its length. but anyway, the diagonal of the square is still longer than its side. It was mentioned that it is a rectangle.. but wasnt bentioned how it was situated, since it could lie on its width or length, and we still dont know which one is longer**

13)About truck and the car. Car is x and truck is 2x => overall 24 vehicles. => number of thucks is 8. yeah (+3)
14)And a problem about mother and her poor daughter. Smth like mother earned 3 times more than her daughter. Help i dont remember it completely… that was A.
3M +8 = D
(D-8) / 3 = M
15)Function of the amout of money paid by marathon sponsors: F(x)=7+0.25m is the answer. (+5)
16)Fraction of people with NOT blue eyes. 22/29(+5)
17)And absolutely disgusting problem about the amount of paint that could be made of 5 part of white and 1 part of red, i suppose. I put 3,6 as an answer.
18)was a system with x, w,z. We had to find out the w/x?? I think the answer was 5. Who agrees? It was 25. well may be...
19)Was there an answer like 0.1 in grid-in??? it was the midpoint between 1.1 and 1.2 ? yeah, exactly it was 0.15 (+3) yeah i think the numbers were .1 and .2 The numbers certainly were 0.1 and 0.2. Why is that 0.15? ?? I dont remember the task, mid point
20)i remember the answer 14 in grid-ins
21)WOHOO there also was a question about boy and his father. The boy was smth like 41 feet and his father 49??? WHo remembers help!! 5 foot 10 or something. **I double checked this, it was 5'10.**
5 foot ten(+6)

22)HEY GUYS there was a question about twoparabolas and we had to find c! what did you choose? i think -25 ( ) i got -17 (+2)
- i remember a question with a square and we had to find the area of the trapezium.
50? (+2) wasn't it 75/2?
-also, sum of a and b (10?) they were coordinates on a plane or something (+2) 100%
-was some answer 4?
(I think I put 4, not sure). Answ: 4(+1)
what did you put for last question with circle , and have a triangle inside it , in the 16 questions section was the last one ??
-oh I remember: it was 45. 10% sure I think that since the side was half the other side the angle has to be half as well. 45 is right(+4)
one of the 2 triangles **(There were two triangles drawn in the diagram??)** was equilateral, so one angle was 60, and half of the other angle was 60 too. So that meant 60 was left for the two other angles, and they were equal because the two (**So...what was the answer to this question?)**
- there was also a question about some angle and the answer was (a)120. YES, i remember it.(+1)
It was equilateral because they gave one side that was the radius, and said it was equal to one of the other sides that wasn't the radius, and the third side was the radius too...

the top part of the triangle has to be 90 degrees as the base of the triangle lies on the diameter of the circle.

one of the answers was pie d (+3)
-one was 1980 (the year) -> Yes (+3)
-another answer was p = m, when they took the greatest and smallest of the values of a number set and asked about the median < i got this too -> true! (+3)

guys what about the one like there was a graph and answer was 26? it was a multiple choice question (+4) is it certainly right? i got 26 too
oh yeah, the scatterplot diagram.

-one was 1 and 3 only the options were -1, 0 and 1
(+4)

The grid in answers…

-25
-0.15 (+2)
-1250 (+1)
-37.5(+2)
-there was one that was 602 ← yeah i think there was one -> Yes there was → it was sth starting from 700 then i subtracted sth and got the same answer :)(+1) wait wasnt it 603

-and maybe an 8?yes (+1)
and a question about number of puppies? don't remember the answer i think that must have been experimental <- no it was not i had reading experimental and got this question… was it about number of pets in 20 households? I -Me too, got 32 (or 36) can't quite remember → yeahh i got 30 something .. i think 36! i cant remember too :/ I got 44… lol…. Did we just have to add the numbers from pie chart???? take care there was a percentage in the pie chart who had no pets i i didn count them **It was just doing cross multiply. 20/100**
-there was also a question with 2 circles one with radius 6 and the other with 2, we were supposed to find AQ. Was the answer 14? -> Yes it was (very easy one…) (+2)

oh yeah the slope one was 0 (+2)<<< what question was that

what was the last grid in question answer? question was:
ax + b (x + c) = 17x + 52
give a possible value: 15, 4, 16, 11 as well, can someone check is 6 possible answer? I put 9.
Only possible answers for these are 15 and 13 because when x=0, bc=52 so b and c must be factors of 52.
so i did 26 and 2 for factors of 52

what about 13? couldnt 13 fit?hey plz would someone answer :')

There was also a question about a triangle and one of the sides was 10, which of the sides can be true..There was smth like AD=4, AC=5 or smth like that. Does anyone remember? I think I put sides 8 and 9 or smth. no 4,5 is right, cause 8+9>10, 10-the biggest side

hey guys, did you guys get the question where it was making pink paint out of white and red paint. it was given like 3 gallons of white and red? i omitted that…

I know the answer!!! -> it was 3⅗ or 3.6→ -> for sure!! (+3) yuppi!

anyone remember more? the one that had 30x30 inches stitch thing was experimental
that was **experimental** -> gooood, cuz i didnt get it, what was the answer anyways? uh i didn't get that too , the wording was so bad
what was the question?
i think the answer was E
7 stitches for 1 inch
then 9 rows for 1 inch
30 by 30 inch cloth, how many stitches -> **I think it was 7x9x30x30 = 56700**

huh wtf I don't remember that question at all. which section? IT was experimental no worries lol :) I'm just being real asian and neerdy
yep thats the right answer :) haha

WR

- 4 no errors in identifying error part
    - Egg tempera **(wasn't "in which" weird? shouldn't it have been "where"?)**, copper, the purpose of the trial was to determine whether he or his sister…, Contrary to popular belief
    - **wasn't contrary to popular belief redudant ← noo**
- sentence that starts with (despite) <- is wrong (+5)
- I remember some questions
    -Q29. insure -> ensure < diction error - this is definitely right
    - yes that should be ensure not insure
- hey guys, so what is #7 i think.. it was like "the baker explained that the custard would be better"... "by allowing it to cool before being eaten" and like **"if allowed to cool before being eaten?" (def. that is the answer)** PEOPLE PLZ VOTE if you remember!! we have to find out the right answer!!
- I put if allowed to cool before being eaten. (+8) - before eating it is wrong. before being eaten is correct!
- i put that too! i think it was choice E
- The question about the military coup???? was it no error or B?

Anybody saw the weird Identifying Sentence Error, with the "Despite (A) many animals gather"
Yes, i think there was a mistake in Despite. A) (+1)

- Fingerprint Evidence
    - Such evidence (+1) -> i thought this was illogical
      such discovery (+5) -> i thought it was this because it should refer to the antecedent -
    - Before sentence 11 (+4)
    - Even experts disagree.. (+3
    - Delete from passage (+5), Put at sentence 1 (+1)
    - Although computers can analyze fingerprints, they cannot (+5) / isn't it ____ ,in fact, ___ ?
    - On the other hand,... (+3)
- Section 10
    - Tree frog and "their" skin

        - Its skin… and thus can…. temperature <- anybody found this a bit awkward as the subject of the sentence was the ‘scientists’? and after thus,
        - but then tree frog was the singular so i think it was the only choice that worked with “its” (+3)
        - C worked too.
    - In the 1990, the number of factory ….
        - The number of factory outlet malls, at which brand-name goods are sold at discount prices, greatly increased in the US during the 1990s (+7)
    - sahara desert covers ….. and spans over 11 countries OR covers…., spanning over 11 countries? Spanning! -> I object. Spans, I agree with spans. (+9) agree with “spans” as well. i think it has to stay parallel with “covers” thats why

t was the answer to the question with ‘there to be’..? something like that
that was there was? i put that as an error -> that’s right, although I got it wrong… ugh
same question here. I think I put that one wrong, not sure though… i thought about it, and put as no error. I came across things like that before. I think to be is correct
and in section ten (number 10 :- the underlined (aptly named because their)
my answer was (aptly named because of their)) (+1) what means aptly? apt = appropriate

dude i’m gonna fakin kill u
why would you do that mate?
STOP MESSING UP WITH THE ANSWER SHEET YOU STUPID PIECE OF WORTHLESSNESS (+1)
