

Chapter 4 Presentation - Development Through Life

The topic for your next presentation is “**Development Through Life**”. Specifically, your group of 3 or 4 will choose one of Erikson's 8 stages of human development to research and present.

This presentation will have **three main parts**. For each part, you should cite a *different* source, such as a video, book, or article.

Part 1: Define the stage (*i.e., the age range, name of the stage and what it means*)

Parts 2 & 3: Choose any 2 of the following topics to complete your presentation. Explain the characteristics or changes that occur during the stage:

- physically
- mentally (*i.e., cognitively, psychologically*)
- socially
- emotionally

Your total group presentation should be between 4-6 minutes long. Each person should participate and present equally.

You will present it in class.

Tip: *Don't forget to use Research and Presentation Strategies 1-5, 7-10!*
