

Free Tools for Prototyping, Mockups, and Deliverables

Using free tools, you can create effective prototypes and polished deliverables to communicate your project ideas and gather valuable feedback. This guide provides links to accessible, free tools for prototyping and creating mockups.

Google Slides

[Visit GoogleSlides](#)

Google Slides is great for creating presentations and can be adapted to create simple mockups or visual deliverables with ease. It's often used for project presentations, slides for pitches, and basic visual mockups.

Microsoft PowerPoint Online

[Visit PowerPoint Online](#)

PowerPoint's online version includes basic features and is free with a Microsoft account, making it accessible for creating presentations. Typical uses include visual presentations, project pitches, and multimedia slides.

Canva

[Visit Canva](#)

Canva offers a wide range of design templates and customization options, making it ideal for simple prototypes and mockups without advanced design experience. Common uses include creating social media posts, simple web mockups, and other visual deliverables.

Lucidchart

[Visit Lucidchart](#)

Lucidchart's free version allows for simple flowcharts and diagrams, useful for organizing ideas or creating user journey maps. It's ideal for flowcharts, mind maps, and process diagrams.

Figma

[Visit Figma](#)

Figma's free plan includes access to powerful prototyping and collaboration features, perfect for creating detailed, interactive prototypes. It's often used for web and app mockups, interactive prototypes, and collaborative design projects.

Mockflow

[Visit Mockflow](#)

Mockflow offers basic wireframing capabilities in its free plan, making it a good

choice for quickly sketching out ideas and basic prototypes. Typical uses include early-stage wireframes and concept mapping.

Penpot

[Visit Penpot](#)

Penpot is an open-source design tool similar to Figma, with robust features for creating vector designs and interactive prototypes. It's fully free and collaborative, making it suitable for UI/UX prototypes, web and mobile mockups, and team collaboration.

Adobe XD Starter Plan

[Visit Adobe XD](#)

Adobe XD's free Starter Plan offers basic prototyping and design features, sufficient for simple interactive prototypes. It is commonly used for interactive web and app mockups, clickable prototypes, and visual design.

Additional Free Resources and Tips

Free templates are available in tools like Canva, Figma, and Google Slides, providing an excellent starting point to streamline your design process. Many of these tools are collaboration-friendly, with Figma, Penpot, and Google Slides allowing real-time teamwork, which is ideal for group projects and feedback. For additional insights, use sharing links from tools like Figma or Google Slides to gather feedback from peers or mentors on your prototypes.

Using these free tools, you'll be able to create impactful prototypes and professional-looking deliverables without any cost. Explore these options to find the best fit for your project needs. Happy prototyping!
