SUBJECT: The #1 health “test” (reveals this toxin)

SUBJECT: Take THIS TEST to see which toxic metals you have

Nutrient panels. Genetic tests. Hormone tests.

There are so many “health tests” out there.

But the most important test of all could be something called a [“hair tissue mineral analysis” or HTMA, for short.](#)

Why? Two reasons:

- 1) Because it’s the quickest and most accurate way to find out if you have heavy metal toxicity. And...
- 2) Removing heavy metals should be one of your TOP health priorities.

Heavy metals are some of the most toxic substances on the planet. And they are everywhere.

(Not just in fish or mercury fillings.)

You can never be healthy if you have high heavy metal levels.

[Fortunately, my good friend Wendy Myers has created the BEST solution I’ve ever found for HTMA testing — right here.](#)

So you know exactly which metals you have, and how to remove them.

It's genuinely life-changing, I promise.

[affiliate name]

P.S.—So many ailments, from chronic fatigue... to stubborn weight... even things like allergies, are connected to heavy metal toxicity.

Many people spend thousands of dollars and years of time trying other solutions, which simply cannot work as long as heavy metals (the root cause) are still in your body.

[Go here to learn about Wendy’s breakthrough solution for testing and learn which metals you have now.](#)
