

# Clearing Chromebook Cache/Cookies

Many Chromebook issues, especially login issues, can be solved by clearing the cache. To do this complete these steps:

Click on the three dot menu on the upper right hand corner>Delete Browsing Data

Check the bottom 2 boxes (we enforce a setting where students can't clear browser history for security purposes, but we're just worried about cache and cookies), choose "All Time" for the time period, click Clear Data.

Close Chrome and open again.
