

“This is the best thing your cat will eat”

Indigestion, constipation, and diarrhea are just a few problems your cat will suffer if you give him or her bad food.

What should you do?

Good question...

Treat your fur baby to the best—a wholesome, protein-rich meal that's a must for their health and happiness.

Here at TRILOGY™, we've reimagined cat food. It's not just food; it's a blend of protein, life-giving water, and the goodness of natural grass.

It's more than a meal; it's a recipe for their vitality and well-being.

Throughout history, cats have shown remarkable resilience in the wild, adapting and flourishing for generations by tapping into the natural goodness of their surroundings.

TRILOGY™ embodies this wisdom, bringing together a trifecta of key ingredients that cater to their well-being, ensuring a naturally healthy and fulfilling life.

What is better than nature's food, right? These are the ingredients of our food.

Muscle Boost: Packed with high-quality proteins that cats crave for strong, healthy muscles.

Digestive Support: Our Kibble and Complete Prey™ recipes feature natural grass and fiber, promoting a happy tummy and smooth digestion.

Hydration: TRILOGY™ is made using top-quality water, providing your cat with the essential hydration they need for a healthy life.

These ingredients will ensure your cat is healthy for the rest of his or her life.

This is what TRILOGY's customers have to say about us:

Naomi

My cat walks me to the cupboard now for her food, she is thrilled to have it poured into her bowl and I feel like I can see her pleasure as she sinks her face into the biscuits to eat. Her fur looks glossier and healthy, she is awake more often and playful.

Miranda

I like that the pack is resealable as that helps to keep the dry food fresh for longer. It has the logo quite large on the pack, which is a triangle made up of 3 different pictures/textures - grass, water and the inside of fish. These represent the main ingredients and how they are sourced. I also like that it has a picture of what the dry food looks like. The Lamb pieces of dry food are small and doughnut shaped, with chunky bits of Barramundi and Tuna throughout. The dry food is strong scented of fish, even though it is a good mix of the lamb pieces and fish chunks. As it does not have any cereals, I noticed a change in my cats coat. It became soft and shiny within the first week of introducing the dry food.

Faye

Our cat loves Trilogy Chicken Flavour. I like the it has a lot of water because our boy loves the juice from his wet food. I also like the small portion of the tin which means i can always open a fresh tin that i know he will finish.

So, don't you think that is the best thing that your cat will ever eat?
