However, after getting a paid subscription, you can still browse all users based on their age, sex, location, body type, hair color, education, income, drinking habits, and so on.

Without a paid subscription, you can't contact any other user, and you can't reply to messages in your inbox either.

Messaging System

Mobile App

EliteSingles also comes with a free complimentary app that works equally well on all Android and iOS devices. The app is designed according to the best practices, so it's straightforward to navigate and find potential matches.

Naturally, it shares all of the features with the desktop version, but it makes it easier to send and reply to messages, like profiles, and so on. You can even create your profile within the app and skip the desktop version altogether.
