Summarise the session in three sentences:
<i>The governance frameworks for AI and underlying data is progressively flourishing in the Americas, in Europe, in Africa and Asia. Ethical and legal frameworks addressed tend to align to a certain extent on key principles, to ensure that the data and the systems are of quality and respectful of human rights. The AIDV WG recommendations are providing incentives to consider specific aspects that will allow further developments to strengthen responsible AI developments and data visitation for facilitating innovation.</i>
Key outcomes/actions/takeaways
<ol style="list-style-type: none"> 1. AI Bill of Rights Recommendations, Ethics Guidance, and Guidance on Informed Consent outputs are ready for implementation and adoption 2. Need to Publicize the AIDV Deliverables, Pilot some use cases 3. The AI governance landscape is taking shape and the session provided a nice overview of existing achievements/initiatives that serve open research. National legal frameworks [are being enacted] regarding the need for trusted data and data access to pave the way for AI. Legal and Privacy offices/services have to be more involved in AI enabled platforms and projects.
