

Hey “name”

Happy to introduce you to Elecjet - the world's fastest power bank which fully charges your smartphone in just 27 minutes. (Release date scheduled for October 20th, on Indiegogo).

We would be happy to give you exclusive access to one of our limited ElecJet samples so you can personally test and share your honest review with the audience.

Why chose Elecjet?

6x Faster Charging - Unlike traditional power banks that take 4-8 hours to get charged, Elecjet uses revolutionary Graphene technology to top itself up from 0 –100% in only 25 minutes!

5x Sustainable - Graphene batteries last over 5 times longer. This means for every 5 batteries our devices go through, we can use just 1 battery.

2X charging at once - With its pass-through charging ability, Elecjet can get charged, while also powering up your device faster than ever.

In combination with its mind-blowing mechanical specs supporting Elecjet's innovative concept, this power bank is a must-have for each and every tech lover.

Hurry up to claim your sample unite now by replying with “interested”, as we don't know how many samples will be left by the time you made your decision :)

Best regards
