

This is a recommendation list from Dr. Arthur George Scott of Digital Keyboards that are perfect for children, teens, and adults.

If you purchase from Amazon, usually the shipping is free, and so are the returns.

Touch-sensitive is required in the product description.

Digital keyboards come in three sizes: 66, 76, or 88 notes. Weighted keys are an option but not necessary for a beginner.

Dr. Scott can also give you direct referrals to tuners, technicians, piano rebuilders, and local piano dealers who are trustworthy. Feel free to call and ask.

Video – this seems to be out of stock but you might find the model available outside of Amazon.

I would never recommend buying a used digital keyboard – it could be damaged, a child can pour milk into the keys, etc.
