

Cleaning Tips for Electronics

Make sure the device is **OFF** - not just asleep, but **OFF**.

Never use any product containing any ammonia or other strong solvents to clean your Chromebook / Device or Computer.

Do NOT spray or wipe your Chromebook / computer with any Windex/household cleaner/water and/or cleaning cloth/wipes.

YOU CAN spray a microfiber cloth with a solution of at least 70% alcohol, wipe your keyboard, mouse, and touch screen as applicable. **Do Not Spray Directly On Any Electronic Equipment.**

Note: You may want to wash your hands or have hand sanitizer around and use it BEFORE you touch a computing device - particularly if it is shared. Just as important to know that even if the device is largely exclusive to you - you may have picked up a germ or 2 in your travels - Wash or sanitize your hands before you touch your computing devices.
