

Hey G's , I've created free value for a dog trainer with an email list with the aim of providing these three emails as free value

Email 1:

Subject line: If you want to STOP getting the same old outcomes

Name,

If you want different outcomes, you have to change your inputs.

That is to say, if you want different results, you have to take different actions...

Time + Effort = Results

Most dog owners have trouble taking away treats! Then wonder why their dog begins to drift?

You probably just want him to check in more with you?

The only answer is training..

Remember nothing is for free in this world.

Email 2:

SL: Make them STRONG, don't break them....

Probably 98% of dog people don't play sensibly with their dogs

Most puppy owners make the mistake of thinking it's just about throwing sticks and balls.

Maybe it's just fighting over the ball.

Could even be tag of war !

Ah.... but where's the Joy in that?

Or is it wanting to assert dominance at an early age? If anything I like my dog to think he's the dominant part in such games.

Neither is it just about running up and down for the dog.

It's a team effort you're both playing with each other.

For more dog advice and Helpful tips

Check out my IG...you might yet become one of the 2% [insert instagram profile]

P.S: If you want to understand your best friend more, I have an in-depth course about basic obedience and puppy raising. Click here - [website link]

Email 3:

SL: This is going to sound INCREDIBLY callous....

Name

Not using a leash at all is one of the most common mistakes I see people make all the time. It's not even about corrections or pressure!

Imagine asking your dog to „out” without having the option to hold him back?
And decides to do a rebite creating a sloppy way out....

Am not about worst case scenarios but, attaching your dog to yourself in one of easiest and most effective ways.

Better your training and prevent mistakes from happening.
