Skills

: JavaScript (ES6+), TypeScript, React, Node.js, jQuery, PHP, Jest, Cypress, Docker, HTML/CSS, SCSS, C#, .NET Framework, Python, Bash, Linux, GraphQL & REST APIs, AWS, SQL, Relational Databases, CI/CD

Experience

Company Name | City, ST

: **Senior Full Stack Developer**, Dec 2021 - Oct 2024

- Spearheaded development of our design system into a unified standalone component library, and migrated Bootstrap 5-based frontend templates to utility class-driven TypeScript components using React, Svelte, Tailwind, and Storybook for development, testing, and documentation.
- Led the re-architecting of our public web properties, including transitioning our application deployment processes to CI/CD, migrating our application layer to Docker for faster developer onboarding and environment parity, incorporating modern Node-based frameworks and build tools into our development, and integrating feature flagging and automated testing.
- Drove initiative to implement A/B testing into our web properties in order to gather actionable data to help inform product direction and priorities.
- Developed and maintained our infrastructure through AWS using EC2, S3, RDS, Lambda, CloudFront, CodePipeline, and Route 53 with infrastructure-as-code tools including Terraform and CloudFormation.
- Integrated our content-management system's REST API with Marketo to serve personalized content to users in our sales funnel, which generated \$28 million revenue in FY2024.

Company Name | City, ST

: **Web Technology Developer**, Aug 2019 - Nov 2021

- Developed and maintained university sites and applications across a variety of languages and frameworks including PHP, React, and .NET Framework.
- Created headless React ecommerce site for selling university publications via Shopify's GraphQL API.
- Configured and managed backend systems running Apache, nginx, CentOS, and Amazon Web Services such as S3, CloudFront, and Route 53.
- Monitored search performance and generated reports via Google Analytics to help inform business decisions.
- Adhered closely to WCAG standards in order to meet ADA requirements and build a more accessible web.

Company Name | City, ST

: **Lead Web Developer**, Jul 2017 - Jul 2019

- Led development team for client projects, collaborating via Git and Agile practices.
- Worked on myriad PHP, React, and Angular projects based on collaboration with clients and hand-off from design and project management teams.
- Provided troubleshooting and technical support for clients and team members for issues concerning DNS and web hosting.

Company Name | City, ST

: **Web Developer**, Apr 2016 - Jul 2017

- Led development of client websites including design, coding, and deployment
- Developed applications including custom payment portals built with languages/frameworks such as C#, .NET, SQL, and AngularJS and Angular 2+.

Company Name | City, ST

: **Web Developer**, Oct 2013 - May 2015

- Served as project manager for numerous clients' websites, working with a team of graphic designers and other developers.
- Redesigned and developed company website to modern mobile-responsive standards.

Education

University of Name | City, ST

: Bachelor of Arts in Cinema Studies, 2009 - 2013

- Coursework in Interactive Digital Arts working with HTML, CSS, JavaScript, and ASP.NET.
- Volunteered for Program Name camp, a program aimed toward introducing female students, non-binary students, and students of color to STEM at a young age.
