

## **Oracle Unveils New Retail Allocation Capabilities with New Release of Oracle Retail Allocation**

**KUALA LUMPUR, 12 Aug 2013** – Oracle Corporation (NASDAQ: ORCL), the world's leading IT solution provider, today launches [Oracle Retail Allocation](#) to help retailers improve customer experience and increase inventory sell-through.

The new release of Oracle Retail Solution enables retailers to deliver the right product, in the best assortment, for each location using real-time inventory levels along with sales and planning information.

“Smarter allocation is the last mile to improving customer experience and protecting margins,” said Mike Webster, Senior Vice President and General Manager, Oracle Retail. “The latest update to Oracle Retail Allocation delivers deep retail functionality, actionable insight, and a user interface that makes sense for today’s users.”

Overlaying science with the art of merchandising, Oracle Retail Allocation 13.3 provides dashboard reports and recommendations consider the entire lifecycle of a product and optimize allocations to speed inventory turn and protect margins.

Oracle Retail Allocation 13.3 adopts a modern Java interface that employs product images rather than just the SKU number or product name, which helps accelerate the allocation process while encouraging better visibility and control over inventory allocation to stores.

By integrating with the broader suite of Oracle Retail solutions including [Oracle Retail Merchandising System](#) and [Oracle Retail Assortment Planning and Size Profile Optimization](#), the allocation solution promotes shared visibility across key retail business teams and creates more fluid and efficient merchandising, supply chain, marketing and inventory management decisions.
