Pre-visit Work for Students Before Mentor Meeting

Phase 2: Design - User Interface & User Experience

Pre-visit Questions For Students To Prepare For Mentor Meeting

Preparation for the mentor visit (in-person or virtual) allows students the opportunity to reflect on their current work and identify questions and areas of interest that they can discuss with the mentor(s).

Potential Questions Mentor May Ask You (Student)	Questions You (Student) May Ask Your Mentor	Notes
• Who are your users?	o How do you make sure that all users are being considered?	
• Describe the need/pain point that your product will solve for the typical user. Describe the solution to the need/pain point that your product represents.	o How do I write a brief statement that describes the need/pain point and the solution that our product represents?	
• Please describe the user experience of your proposed product.	o What metrics do you use to measure user experience?	Be prepared to share your wireframe with your mentor, and receive feedback.
• Please describe the user interface of your product.	o How do you test user interface at your company?	Be prepared to share your wireframe with your mentor, and receive feedback.
• In what ways is your design accessible to users with different needs?	o How do you solve accessibility challenges in design at your company?	
• Describe your first design sprint.	o Can you describe the design process you use?
