OBJETIVO PROFISSIONAL

## Junior Full Stack Developer / Data Analyst

### TECHNICAL SKILLS

Motivated **Full Stack Developer in training** with a strong foundation in **Java, JavaScript, C, .NET, TypeScript, HTML and CSS**. Currently developing technical excellence through EBAC, DIO, ALURA and 42 Ecole.

Hands-on experience building **web applications, front-end interfaces, REST integrations, automation routines, and data processing workflows**. Strong analytical mindset, autonomy, and problem-solving skills — with experience in data analysis from a large-scale financial institution.

- **Languages & Technologies:**  
Java, JavaScript (ES6+), TypeScript, C, .NET, Node.js, HTML5, CSS3, SQL (CRUD)
- **Frameworks & Tools:**  
Next.js (App Router, SSG/ISR), Redux, APIs (REST), Git/GitHub, Yarn, Vercel
- **Principles:**  
Clean Code, Problem Solving, OOP, Automation, Data Analysis, Software Engineering Fundamentals
- **IDEs:**  
Visual Studio Code, IntelliJ IDEA

### EDUCATION & TRAINING

- **42 Ecole (Software Engineering Piscine)** — 06/2025  
Problem-solving, C programming, algorithms, peer-to-peer learning
- **WEX – End to End Engineering Bootcamp | DIO** — Expected 08/2025
- **Full Stack Java Developer | EBAC** — Expected 11/2025
- **Backend with JavaScript | ALURA** — 04/2025  
**JavaScript: Types, Variables and Functions | ALURA** — 05/2024  
**Java OOP Complete | ALURA** — 05/2024  
**Java Practice: Loops, Conditionals, Strings & Regex | ALURA** — 2024  
**JavaScript Arrays & Objects | ALURA** — 2024
- **Algorithms and Logic | Udemy** — 02/2023

### PROFESSIONAL EXPERIENCE

#### PagBank International — São Paulo, Brazil

##### Data Analyst Trainee

- Large-scale financial institution
- Conduct data analysis focused on operational insights and process optimization.
- Develop automation workflows to reduce manual work and increase efficiency.
- Build and maintain large-scale spreadsheets for big-number operations.
- Create flowcharts and process mapping to improve team routines and cross-department workflows.
- Support data-driven decision making and continuous improvement initiatives.

### RELEVANT PROJECTS

## Portfolio Website — 07/2025

### *Personal Project*

- Built with **Next.js (App Router)** using **SSG + ISR**.
- Styled with CSS Modules and design tokens.
- Deployed and monitored with **Vercel**.

## Skyscrappers — 06/2025

### *42 Ecole — Software Engineering*

- Web app providing restaurant suggestions.
- Developed with **TypeScript + Redux** and integrated external APIs.

## Efood — 07/2025

### *EBAC — Full Stack Java Developer*

- Restaurant recommendation platform using **TypeScript, Redux and API integrations**.

## LANGUAGES

- **English — Advanced**
- **Japanese — Basic**

## CORE COMPETENCIES

- **Analytical & Data-Driven Thinking**
- **Autonomy & Fast Learning**
- **Strong Problem-Solving**
- **Communication & Cross-Functional Collaboration**
- **Software Development Fundamentals**
- **Process Optimization & Automation**
- **Product & Customer Focus**
