

as Magically access any Social Media platform, websites and Web Apps from the menu bar or in a floating window. Watch videos, chat with your loved ones, share pictures, etc!

Access your favourite Websites and Web Apps easily and quickly.

RESIZE the menu bar window like a regular window!

Save the websites addresses with their Website name and Logo or set a custom name and icon, then easily access them from the menu bar.

Open the websites in the menu bar popover which you can resize by dragging its margins, or open them in separate windows.

..... ACCESS SOCIAL MEDIA PLATFORMS

Visit social media platforms and stay connected to your friends and followers while using your Mac. You can switch between the mobile version and desktop version for a better experience.

Log into multiple accounts by opening new always-on-top window with the selected website.

..... WATCH VIDEOS FROM ANY WEBSITE AND STREAMING SERVICE

Watch online media content while you do other activities on your Mac.

Keep a window always-on-top and watch videos, tutorials or any other web activity.

..... SWITCH BETWEEN MOBILE AND DESKTOP WEB VIEW

Select between multiple Operating Systems to load the websites such as MacOS, iOS, Android, Windows OS and Chrome OS.

Some websites or web apps offer different experiences when viewed from a mobile OS, like social media platforms.
