

Attack Potency: **9-B** (Nexus defeated Kai, whose strength was great enough to break through solid walls), **7-A** (Nexus defeated a monster capable of destroying a mountain by utilizing his F=ma techniques), **2-A+** (Nexus defeated Anti-Ways, who has twisted Meta-Time that act as a countless of alternate timelines), **1-A** (Nexus defeated Chronos who sees the framework of Space and Time as nothing more than just a puppet show), **1-A+** (Nexus defeated Anti-Ways, who had absorbed the energy of the Reverse Force, a creation of his own. This power elevated Anti-Ways to a state of existence that even Chronos cannot reach. Due to his cruel nature, he then banished Chronos into the abyss), **Likely High 1-A** (Positive Force isn't just a source energy or an extra-dimensional energy field, but the true nature of Positive Force is who predates the absence, who defines the Formless, Definition and Division on how it should operate, without Positive Force as a main source, it cannot exist and will not)

Speed: **FTL** (Nexus body contain the Tachyon Particles which is the reason he can swift quicker than the light speed), **Massively FTL+** (Nexus saved 700,000 people from a hydrogen bomb, moving them 400 miles in just zeptosecond), **Infinite** (Nexus can move that time become froze as he move faster than time), **Higher degree of Infinite** (This is when Anti-Ways can also move that time become froze and Nexus with his Positive Force connection let him perceive Anti-Ways in frozen state as he move even faster than him) **Immersurable** (Via running through Time Barrier and Meta-Time), **Higher degree of Immersurable** (As both Nexus and Delta have Immersurable Speed via running through Time Barrier and Meta-Time, Nexus can move faster and perceive Delta in state of frozen via his Positive Force connection), **Irrelevant** (Nexus can move faster than Speed Zone which is the concept of speed itself), **Higher degree of Irrelevant** (Delta can also move faster than Speed Zone which make them comparable in speed, but Nexus's connection with Positive Force surpassed Delta completely)

Durability: **2-A+** (Nexus endured a direct strike from Anti-Ways before successfully awakening his Reflexes Style)

Stamina: Superhuman

Range: Standard Melee Range (For physical combat and standard interaction)
Several Kilometers (Via Air Manipulation and Vibration Manipulation)

Standard Equipment: (None)

Intelligence: Above average, his personality in battle is cocky, he prefers taunting his foes and dodging rather than blocking

Weakness: (Coming Soon)

Feats:

Nexus can perceive events far beyond human measurement, reaching down to at least the zeptosecond

By accelerating past the speed of light, he successfully breached the physical world and entered the Positive Force, an extra-dimensional energy field.

He defeated Powerman by moving so fast that his opponent had a 0% chance to react. During this, Nexus executed thousands of attack combinations in a single times

Because his mind operate at speed beyond humans measurements, he can see an infinite number of possible future outcomes

Under extreme stress, Nexus charged his speed to such a high level that the universe appeared to freeze. While time was stopped, he manually unscrewed every part of a giant robot at each continent, causing it to collapse the moment time resumed

Through his connection with the Positive Force, Nexus can move faster than Instant Transmission (teleportation), effectively arriving at his destination before the "instant" even occurs.

Notable Attacks/Techniques:

Infinite Mass Punch/IMP: (Most speedsters or speed based fighters utilize this technique to deal massive damage. However, its use is situational, as many maintain a strict moral code regarding the amount of force they apply)

Reflexes Style: (Dodging is his signature style throughout his story although sometimes he gets hit because of the power of plot lol, he prefers evading over tanking physical strikes. He can perform micro movements to dodge strikes that from a bystander's perspective, it appears to have already landed. At his peak, his reflexes surpass even those of his rival, an evil speedster, rendering him virtually untouchable)

Phasing: (He often integrates phasing into his 'Reflex Style,' making him even more difficult to strike. He can instantaneously vibrate his molecules, allowing him to pass through solid objects or let attacks drift harmlessly through his body)

Coming Soon
