Overview

The aims and objectives of this 'fight club' is not senseless violence, it is far from that. In recent months I have noticed a decrease in morale from both The Department of External Affairs and MTF Nu-7. As a way to combat this decrease of morale I have come up with something that will allow SOP to have some enjoyment during down time and when they are manning compound. The fights will only consist of hand on hand combat with protective gear and medical staff on standby to ensure nothing more than minor injuries take place.

Additionally this will have another positive effect rather than just a morale booster, It will also train our SOP units on hand to hand combat which we all know can be vital to survival in certain CQB situations.

- These short fights can be authorised and set up by any SOP personnel with permission from a Nu7 NCO or Senior Agent+.
- They will only be held within Garage or Compound and nowhere else in site
- Only CL3+ combatives may take part to avoid any issues

I do hope that on top of what was mentioned above it can also improve relations between The Department of External Affairs and MTF Nu7 with some fun competition between them both with no real stakes.
