STORY BODY & BLOCKS

You might not be able to travel far and wide to go to flea markets around the world, but you can still look for vintage-inspired pieces at local [estate sales](#), thrift stores, and secondhand shops. Of course, resale sites like [Chairish](#), [1stDibs](#), and [eBay](#), are options, too. But there's another old world design source that's right under your nose that you're probably not browsing for these kinds of pieces: [Amazon](#).

You can find just about anything on Amazon, but when I did a deep dive to find some European flea market-inspired pieces, I couldn't believe the breadth of what I found. From smaller accessories and lighting to major furnishings like headboards, art, and even quick-ship faux fireplace mantels (yes, really!), Amazon is more of a treasure trove for vintage vibes than you'd think.

My Top 10 Euro-Inspired Decor Picks from Amazon Right Now

Here, I'm sharing the standout pieces with a European flair I found on Amazon. Maybe you'll find something you love on this list — or you can do your own keyword search (and use Amazon's shopping tools like the "More items to consider" and "Related to items you viewed" tabs on your homepage feed to unearth even more gems).

I snagged [a sketch](#) that looks just like this at the Vanves flea market last April, and I have it on a shelf in my bathroom. With this find, though, you don't have to travel to Europe — or pay extra to have your artwork framed — to get the same look. It's a steal at \$17.

The arched ornate mirror silhouette has become synonymous with old world style. Will you see a piece like this in other people's homes? Sure. But that's because [this mirror](#) has now essentially become a classic. I love them over fireplaces, but they're great paired with console tables and large dressers, too.

<https://www.amazon.com/Funly-Antique-Trinket-Vintage-Jewelry/dp/B07STNY7NQ>

Little dishes are the best catchalls for change, keys, jewelry, earbuds — you name it! [This design](#) has Euro-inspired flourishes and gorgeous gold finish. I could also see one being used as a soap dish in a powder room.

<https://www.amazon.com/Creative-Co-op-Linen-Headboard-Natural/dp/B081P2D16S/>

There's something so elegant and calming about a neutral [upholstered headboard](#) paired with cozy white bedding, classic marbles, parquet wood, and the like — all hallmarks of classic European style. This headboard isn't cheap, but it's a quality brand, [Creative Co-Op](#), and it's definitely giving pretty pied-à-terre.

<https://www.amazon.com/Rustic-Cast-Taper-Candle-Holder/dp/B0CM8M5N3K/>

Everyone should have a pair or [trio of candleholders](#) in their decorating arsenal. They're great for fireplaces, dining room tables, and coffee tables, and these feel older than they are, thanks to their finish and rustic silhouettes.

<https://www.amazon.com/Jennifer-Taylor-Home-Storage-Ottoman/dp/B0D4SP32ZJ>

I have [this ottoman](#) in tan, and it's truly a bedroom storage savior. Mine is packed with sweatshirts but you'd never know it, thanks to its stylish pill shape and super-cute fringe detailing. It feels very Rococo IMO, and you could absolutely use one in an entry or living room as well.

<https://www.amazon.com/Moncur-Home-Decorative-Bookshelf-Decoration/dp/B0D9Y3VMY8>

This [trio of books](#) is the easiest-ever way to style out a coffee table. Just buy a pack, stack 'em up, and top it with a decorative object. Then you're good to go. You can do the same thing on just about any hard surface.

<https://www.amazon.com/SOFFEE-DESIGN-Vintage-Wall-Mounted-Candle/dp/B0FGC1G5M3>
[Candle sconces](#) add so much ambiance and drama to walls. I'd use this pair to flank a piece of statement art. They're a wonderful alternative to hard-wired lights.

<https://www.amazon.com/Creative-Decorative-Fireplace-Mantel-03-Furniture-Cabinets/dp/B07E3Q8Y9V>

Yes, you can buy a [faux mantel](#) on Amazon, and this one really looks like an antique. It's certainly not cheap, but shipping is just \$20, and it comes in three different finishes. From that perspective, it feels like a deal.

<https://www.amazon.com/Rjieoc-Semi-Recessed-Lighting-Hallways-Entryways/dp/B0GDFF4LT>
[K](#)

This [semi-recessed fixture](#) also looks like a European flea score. It's definitely a better alternative than the boob light in your entryway or bedroom, and the price is right at under \$40.
