

2025-26

Political Advocacy Club

The primary goal is to create educated voters now and in the near future and to make Minnetonka students politically informed on various topics. Meetings consist of open and civil group discussions on current political movements and actions from both citizens and political leaders on local, state and federal levels of our governments.

Discussions also include topics of international importance, as well.

Discussions are respectful and mature, and the ultimate goal is to listen intently to possibly opposing ideas and viewpoints.
