| IV. PROCEDURES | | | | | |
| A. Reviewing previous lesson or presenting the new lesson. | Recap of the lesson of the previous day Yesterday, we learned budgeting and how it can be applied to the family. Budgeting is critical because it is oftentimes difficult to ensure that we will be able to make both ends meet when times are hard. | | Recap of the lesson of the previous day Yesterday, we learned budgeting and how it can be applied to the family. | | |
| B. Establishing a purpose for the lesson | How can we prudently manage the financial resources of the family? Group the class into four (4). Each group will answer the question. <i>“How can we make both ends meet?”</i> Reporting per group follows. | | A <i>need</i> is something you <i>have</i> to have, something you can't do without. A good example is food. If you don't eat, you won't survive for long. Many people have gone days without eating, but they eventually ate a lot of food. You might not need a whole lot of food, but you do need to eat. A <i>want</i> is something you <i>would like</i> to have. It is not absolutely necessary, but it would be a good thing to have. A good example is music. Now, some people might argue that music is a <i>need</i> because they think they | | |

Using the concepts learned yesterday, come up with an activity that will demonstrate the difference between needs and wants. Think of activities outside the box. | |
| C. Presenting examples/ instances of new lesson | Show photos of different items/situations. Ask the learners if they are needs or wants. Ask why they think it is a need or want. | Presentation per group. | |
| D. Discussing new concepts and practicing new skills #1 | The teacher writes two columns on the board. One column has the heading NEEDS. The other column has the heading WANTS. Randomly distribute metacards containing a list of needs and wants. Ask the learners to post the metacards on the board. Ask the learner to explain/defend his/her choice. | | |
| E. Discussing new concepts and practicing new skills #2 | Based on the activity that was conducted ask the learners to differentiate needs from wants. A need is a requirement for survival, e.g. breathable air. A want is a desire. It may be the desire for a need (e.g. a choking person generally wants to be able to breathe) or for something not needed for survival, such as chocolate or a new car. | | |
| F. Developing mastery (Leads to Formative Assessment 3) | Show a short clip on managing money: Needs versus Wants Analyze the movie and relate it to needs versus wants. Note that some of the contents of the video may be debatable e.g. chocolates is needed by soldiers for endurance in the middle of a war while in a normal situation it is a want for another individual. Original File Submitted and Formatted by DepEd Club Member - visit depedclub.com for more | Giving feedback on presentations. Examples of guide questiona: Was the group effective in emphasizing the difference between needs and wants? If yes, How? What concepts in the presentation had an impact on you? Why? Do you think the presentations can further be improved? In what way? | |
| G. Finding practical applications of concepts and skills in daily living | Ask the class on their comments on the output of the groups. Consider the factors that need to be considered in budgeting and principles to make budgeting a successful and full filling task. | Ask the class on their comments on the output of the groups.
