

Guest Lecture 5

Speaker: Ahmad Nafeez

This lecture on application security.

Questions

- What is a VPN and How do they work?
- How do attackers add more data before the encryption?
- Can you clarify what *passive* man in the middle attacks look like?
- Talk about your journey and how you kept yourself motivated?
- What can I start on in security?

Resources

- Bug bounty / hackerone community
- New attack areas
 - Adversarial attacks in machine learning
