Duns Scotus (1266 - 1308) was a great Theologian and philosopher. His teachings emphasized both the Incarnation of Jesus Christ when God became man and the Saving Power of the Cross as the *crowning glory of God's love for us*. His philosophy articulated the concept that every creature is unique before God. He used these ideas to defend the doctrine of the Immaculate Conception, for which reason he is called the Marian doctor. May his prayer and patronage help us to grow in love for God and His creation, through the Blessed Virgin, and use our gifts to serve His Holy Church.
