

Biology NCEA Level 2

Course Description:

This Level 2 Biology course is designed with a mix of internal and external assessment opportunities. This course will give students the opportunity to broaden their understanding of Ecology, Cellular Biology and Genetic Variation and Change.

Content

There are two external assessments and two internal assessments. The course content will focus on Conservation and Ecology of our Endemic Takahe as well as Cellular Biology and Genetics.

Prior Learning Required

Completion of a Level 1 Biology or General Science course will be beneficial for this course.

Learning Resources:

- [L2 Biology Scipad Bundle \(Int/Ext workbook\)](#)
- [L2 Biology Revision Scipad](#)

e-teacher: Sean O'Toole, otoolles@waihekehigh.school.nz

Provider: Waiheke High School, 0530

Assessment:

Provider Code:

Std No.	Version	Standard Title	Completion	Type	Credits
AS91158	2	Biology 2.6 Investigate a pattern in an ecological community, with supervision	Term 1 Wk 9	I	4
AS91154	2	Analyse the biological validity of information presented to the public	Term 2 Wk 4	I	3
AS91156	2	Demonstrate understanding of life processes at the cellular level.	Term 3 Wk 2	E	4
AS91157	2	Demonstrate understanding of genetic variation and change	Term 3 Wk 8	E	4

I = Internally Assessed | E = Externally Assessed
