

6 STEPS TO IMPORTING PHOTOS

1) Create Project Folder:

In FINDER create a new folder in **your folder** on your computer's external hard drive. The folder name should include the date and project/assignment name.

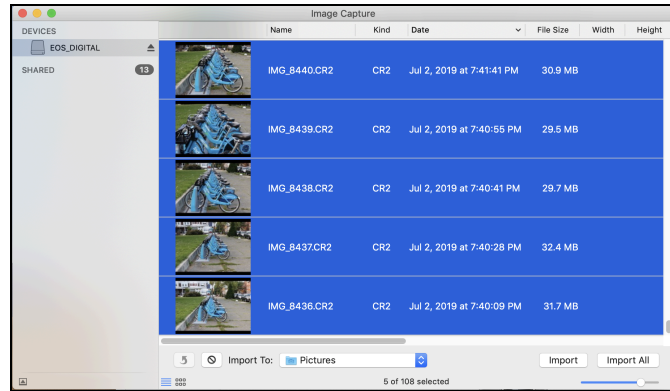

2) Connect one end of the **USB Cord** to your computer and the other end to the camera.

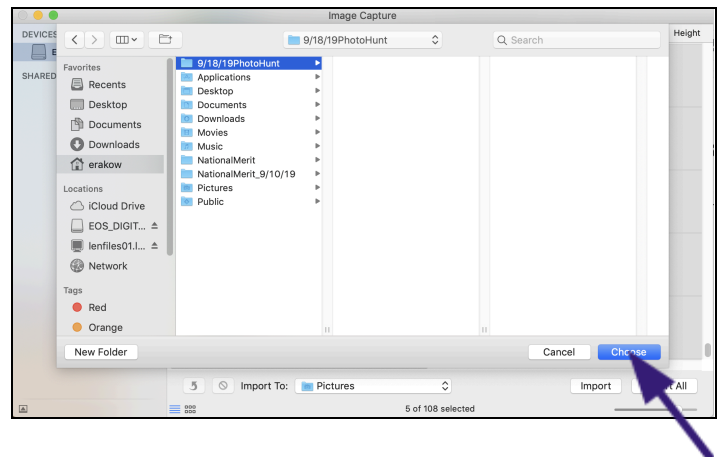

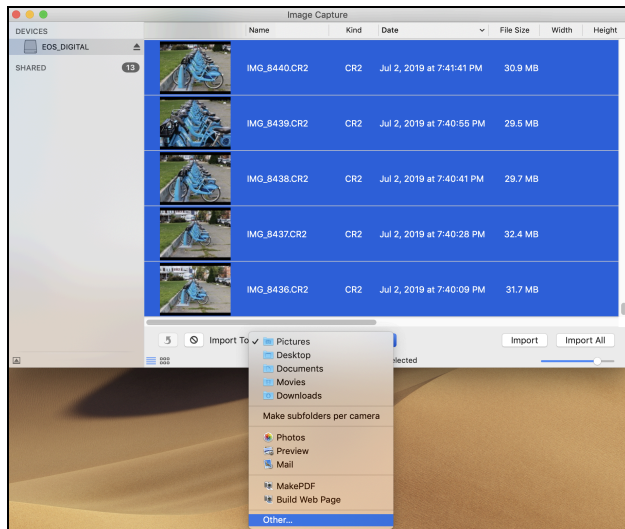

3) Open the Application **Image Capture** from your Dock

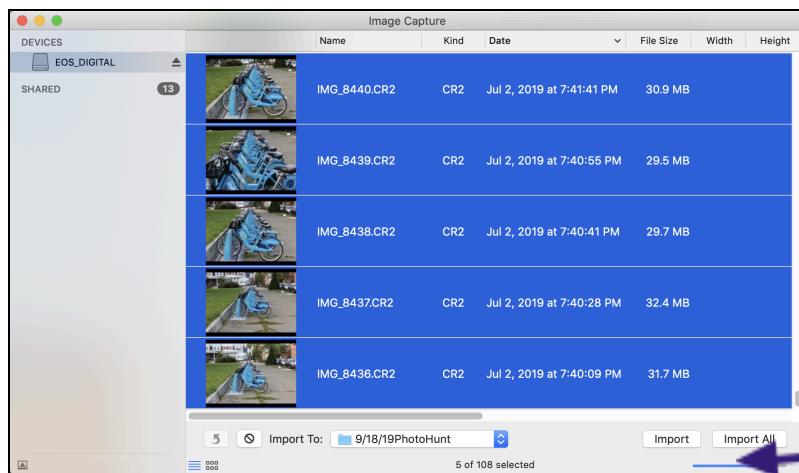

4) Your images from the camera will appear. Select the photos from the camera that you want to import (*To select multiple hold down the shift key and select*)

5) On the bottom where it says **Import To:** Select the folder you just created by going to **Other > Mac # External > the new project folder you just created**. Hit **Choose**

6) Select the **Import** button.

CONGRATS! YOUR PHOTOS ARE NOW IMPORTED AND READY FOR YOU TO EDIT!
