Tagline

A community-led organization dedicated to fostering, building, and maintaining tools and specifications for the conda ecosystem.

About the Conda Organization

We are a community dedicated to the conda ecosystem. We provide three main functions for the community.

- Project Hosting: We host projects for the conda ecosystem in the [conda] GitHub organization. Hosted projects benefit from the visibility of the conda GitHub organization and the expertise of its members.
- Project Incubation: Members of the community can ask that their conda tool or specification be moved to the [conda-incubator] GitHub organization. This process increases the visibility of the tool/specification and provides a forum for discussion and development. After the tool/specification has reached maturity, the core governance team can call a vote to formally incorporate it into the ecosystem.
- Specifications: We maintain and vote on specifications for the conda ecosystem. These specifications ensure that conda ecosystem is extensible and its tools are interoperable.

Get In Touch

Say hello and get involved with the community. We look forward to meeting you soon!

- [Join our slack]
- [Leave us a GitHub Issue]
- Attend our [community meeting]: We meet twice a month to discuss community issues, specifications, roadmaps, etc. Our past meeting notes are [here].

Contribute

Excited to contribute to the conda community? Great! You can join us in a few ways.

- Contribute to the incubator: If you have a project you'd to contribute to the incubator, let a member of core know by [leaving us a GitHub issue]. We will work with you to have that project moved to [conda-incubator].

- Open a Pull Request or Issue against [our projects]: The conda ecosystem relies on community members for ideas, bug reports, and maintenance. We welcome all contributions to this community effort!
- Review our [contributing guide]: If you have questions, need ideas, or want to learn about the contributing process, this is a good place to start.

Meet Our Team

We have a [core governance] team drawn from both the open-source community and industry. We deeply appreciate the support of our industry partners, especially Anaconda Inc.

Notes/Ideas

Notes from Community Meeting

join our slack
document long-term plans
outline governance doc
document how to get involved etc
publish meeting notes
list sponsors / contributors
list of repos
who to bug
some text on specs and how it guides the community

Think about why someone might use this website (ensures the information serves website users)

- To understand what Conda Community and/or Incubator is
- To answer questions about Conda Community and/or an Incubator project
- To find a project
- To find people working on these projects or leadership in general
- To find out how/what ways they are welcome to contribute

Relevant Text from Governance Document

“This document defines the conda organization as the body responsible for governing the tools, specifications, and libraries within the conda ecosystem, broadly speaking.”
