Journal of Thailand Nursing and Midwifery Council   **Add Author Name here ....**

Extended Abstract **(Times New Roman 12 pt, bold)**

At least 800 words. Contents should concisely describe the background introduction, objectives, design, methodology, results, conclusion and recommendation.

It is suggested that the full- expanded form should be provided before providing the abbreviation, acronyms, or other shortened forms at first use.

Introduction

Objective(s)

Design

Methodology including sample, sample size, and sampling method, setting, instruments and instrumental testing, data collection and data analysis

Results

Recommendation including recommendation for implication in policy/practice/education and future research

Keywords keyword 1/ keyword 2/ keyword 3/ keyword 4/ keyword 5

(List 5 words that capture the essence of your paper making it searchable. The keywords are written separately by slash (/), and no punctuation is used after the last keyword. Keywords must represent the content of the manuscript and be specific to the field or sub-field of the study. MeSH Tools for finding keywords is helpful and suggested.

Background and Significance

This first section should contain phenomena of interest underlying the research, the rationale, the key problem statement, and a brief overview of the research questions addressed in the paper.
Knowledge gaps in research or problems in a particular field that have not been addressed are expected to be addressed clearly in this part.

The Vancouver referencing system is required. All in-text citations are in superscript numerals following the punctuation. Abbreviations should be defined in full at their first instance.

Objective(s)

Hypothesis (Optional)

Conceptual Framework

Methodology

Research design (In case of Randomized Controlled Trial, please provide the name of registered organization and registration number here)

Population and sample (include population and sample, sample size calculation, Inclusion/Exclusion criteria, sampling method, and setting)

Research instruments

Ethical considerations Please note that the Ethical Approval Code with approval date is required for all studies on people, medical records, and human samples. .

Data collection

Data analysis

Results

Discussion

Limitation

Recommendation (including recommendation for implication in policy/practice/education, and future research)

Acknowledgement

Declaration Statements

    Conflict of interest: (Identify conflict of interest and management or identify "No conflict of interest")

    Author contribution: The contribution of each author on this study should be identified based on the CRediT Taxonomy available at: https://groups.niso.org/higherlogic/ ws/public/ download/31067/CRediT_Taxonomy_Terms_and_Definitions_list

Example:
Piaseu N: Conceptualization, Methodology, Project administration, Funding acquisition;
Thongbai W: Data curation, Formal analysis; **Wannasuntad S:** Visualization, Writing-original draft, Writing- Reviewing and Editing.

    AI Use disclosure:

    (The use of AI tools in this part refers only to the writing process, not to the research conduction process. Generative AI and AI-assistant tools, such as ChatGPT, should only be used in the writing process to improve the readability of the manuscript. Use of the AI tool(s) should be properly documented by identifying the tool's name and the purpose of use.)

Example: The author(s) used [NAME TOOL] in order to [REASON]. After using this tool, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

References
(Vancouver referencing style as link below and should not exceed 30 references)
https://drive.google.com/file/d/1twSa9cqa4sHcP_tp-Ybl3lZgAUo-bVRe/view

Please check our website at Instruction for Authors to find the correct style for our Journal of Thailand Nursing and Midwifery Council at https://he02.tci-thaijo.org/index.php/TJONC

The manuscript is limited to 15 pages (not including references)
