About Me:

Hi! I'm Hubbubble, the full-band charter of a bunch of Hololive songs and setlist manager for YARG. I started charting in May 2021, and have since been charting for many teams and setlists including the official YARG setlist, CSC, Anime Hero, and the J-Rock Band Project.

My favorite genres to chart are J-Rock/J-Pop (especially Vtubers and anime), light EDM, indie rock, alternative, and punk, and I am proficient at charting for all genres. I can chart any 5-fret guitar part (guitar, bass, keys, etc.), drums and vocals, and I assure that the charts you commission will be crisp and enjoyable to play!

Guidelines:

Status: **OPEN**

- How to Contact Me: DM me a message on Discord about which song(s) you would like to commission. Please make sure you allow direct messages and that you're on the CH Discord server!
- I will accept anything that is reasonable and appropriate, though I hold my right to accept or decline certain songs or requests. If I have a large number of commissions, I may put your commission on hold.
- Please give specific details when commissioning a chart for a song. See the "Pricing Info" section for specific prices on additional features (full difficulty, multiple parts, etc.)
- I'll provide a price estimate for a commission you propose.
- You can send me messages about commission details and progress. Please be courteous! I aim to finish each commission within 2 weeks.
- When a commission is finished, I will send you the files, and release the chart to the public. You will be credited for commissioning the song.
- You are allowed to modify the chart as you wish, but please do not modify the .ini file without my permission.

Pricing Info:

- All transactions are to be made on PayPal. Info will be given over DMs on Discord.
- The starting price for a chart of a song up to 4 minutes long is \$25 per part included (guitar, drums, bass, keys, vocals, etc).
 - Each additional minute (or fraction of) costs \$5 more per part.
 - You can expect an expert-only chart with assured quality: accurate and fun to play!
 - Practice sections and star power included.
 - The metadata will mainly have standard info, but it will be up to your preference, including the description.
 - Lyrics are not included (unless vocals are part of the commission).
 - If a part has very high complexity such as numerous unique riffs or solos, the price for that part may be increased, but by no more than \$10.
- Additional features come at extra cost:
 - Lyrics (with no vocal notes) will cost \$5. If the song is very long (4+ minutes of lyrics) or the lyrics are very dense, an extra amount up to \$5 may be added.
 - Adding full-difficulty to one part costs 50% of the part's cost. You will receive Hard, Medium, and Easy charts for that part.
- 20% discount to full-band charts (at least three parts, including drums)
- Example 1: Song with length 6 minutes, expert-only guitar part, no lyrics
 - One part: \$25 (base) + \$5 * 2 (extra minutes) = **\$35**
- Example 2: Song with length 3 minutes 40 seconds, full-band full-difficulty chart with guitar, bass and drums, lyrics included
 - Each part will cost \$25 (base) + \$12.50 (full-difficulty) = \$37.50
 - Lyrics = \$5 (assuming the singer takes some breaks)
 - Total: $(\$37.50 * 3 \text{ [number of parts]} + \$5) * 0.80 = \mathbf{\$94}$
- Price is negotiable for reasonably strange edge cases! (i.e. very short songs or very specifically weird commissions)
- After finalizing the details of the commission, half of the payment will be due when I begin charting the commission, and the other half of the payment will be due once I give the finished chart to you and release the chart to the public.
