

DSLR FILM NOOB PODCAST Episode 113

Looking for the latest and greatest for your work station? [Check out the Radeon Pro Wx 9100](#) as well as [the rest of the Radeon pro line](#). and if you are on a budget there is always the [RX 480](#) which is sold out everywhere.

The [WX9100](#) maxes out at 32GB of GDDR5 memory and supports an internal SSD drive for faster data access. With that much on board ram and SSD capacity you could load huge models into your GPU and move around in them in real time..... VR anyone? No word yet on pricing, but there is speculation that the entire lineup of WX (7100, 5100, 4100) cards will be under \$1000 and the 9100 will be much higher.

[Firmware update](#) for both the Atomos Ninja assassin and Shogun adds Cinema DNG and extended Dynamic range on screen.

“an image on screen that has approximately two more stops of dynamic range than without the processing”

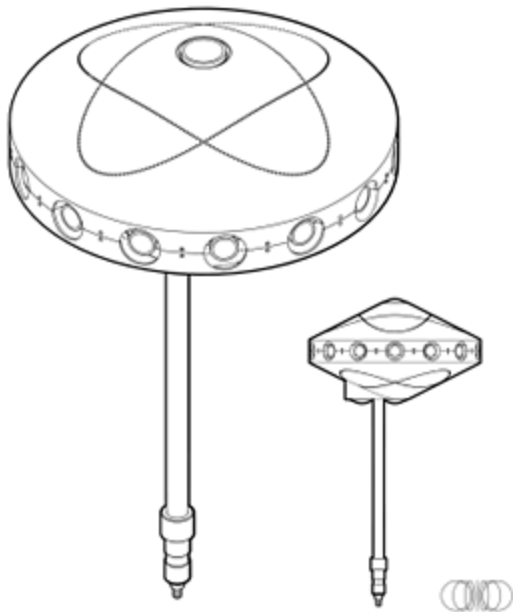

The Cinema DNG is still in public beta which will benefit FS5 and FS700 shooters who are after raw capture.

Nikon just announced a pretty sexy [105mm f1.4 lens](#). At a pre-order price of \$2196, it won't be cheap, but for all the shallow DOF, you pay. Expected to ship at the end of august. [You can find sample images from the lens here](#).

i Assembly Note
Install screws in star pattern for better fit.

Want to build your own High end 360 rig? Facebook is providing the design and assembly instructions of their open source [VR rig on Github](#). Total cost of parts for this meager DIY project, \$30,000 and about 4 hours worth of work to assemble.

Want to stream spherical video from your iPhone..... Now you can with the [Insta360](#). I guess we'll need this in our new Facetime VR world?

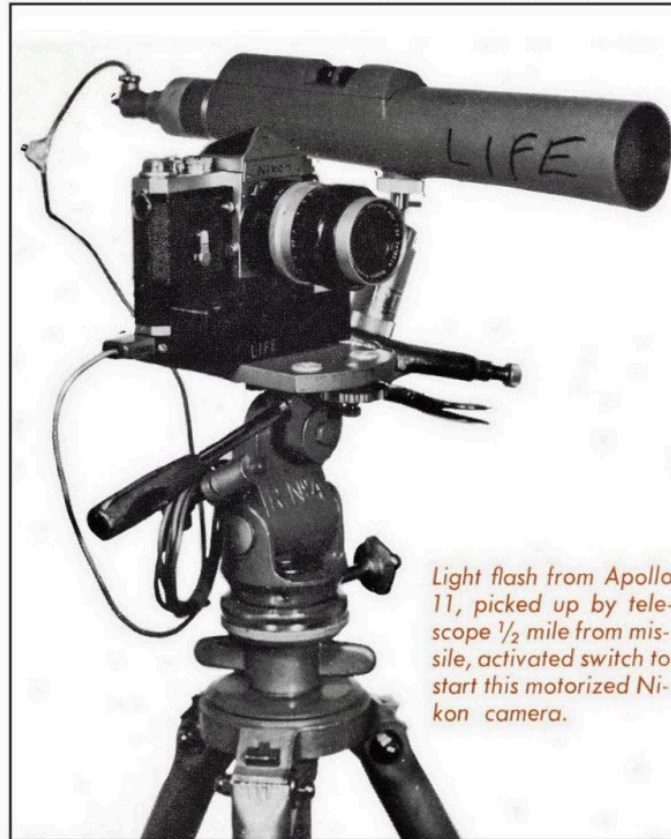

“Real-time 360 video/photo sharing on Facebook/WeChat, Live streaming” for only \$199
