

Community Impact Lead Generator Catalyst Weekly:

Both Cardano4Climate & Sustainable ADA were funded in Project Catalyst fund 8 to create a decentralized lead generation model to help onboard more impact-driven businesses and cross-chain projects to Cardano and incentivize community members to take part in the process.

Flow

- We are using the power of the community to generate leads to onboard impact companies & cross chain collaboration opportunities for Cardano.
- Community members will leverage their network and expertise to onboarding new leads and be incentivized for their work.
- The goal of this work will be to reach more companies and projects to establish a collaboration with Cardano and its ecosystem.

We are calling all Cardano community members to participate in this opportunity to be incentivized for helping onboard new impact projects to the Cardano ecosystem.
