09:14:28 From Hervé L'Hours (UK Data Service) to Everyone:

While I understand the TRSP vs pass through to the repository question, for things like 'certification' with the example of CTS, ISO etc, the degree of pass through would depend on whether there was a. some modularity in the requirements (TRSP vs repo) and whether there was some more specific analysis of the degree of responsibility vs shared responsibility for different activities and functions.
