

Year 7: Music

Design a new musical instrument

Imagine a unique musical instrument! Consider how it might look, sound, and be played. Draw a detailed design or build a model, and then share your creation with your teacher or upload it to Google Classroom.

Guidance/key questions to ponder:

- What materials would you use to create your instrument?
- How does your instrument produce sound? Can you describe its tone?
- How is it played—do you hit, pluck, or blow into it?

How should they communicate with school when task is complete?

Share your creation with your teacher or upload it to Google Classroom.
