We Predict a Test In Your Future…..

Dear Parents,

It's test time again! Please study these concepts with your child to fully prepare him/her for the following test**.**

<u>**Math Chapter 4**</u> **– Thursday, December 10th**
Please review these concepts prior to the test.

- 2-digit addition with and without regrouping
- Rewrite horizontal addition problems vertically

  e.g. 25+8=   25   34+56= 34

                   + 8   +56

- Solve problems involving 2- digit addition by using the strategy **draw a diagram.**

  Example # 1 Kathy had 13 crayons. Her dad gave her some more crayons.

  Then she had 19 crayons. How many crayons did Kathy's dad give her?

  $13 + ? = 19$

  Example # 2 There are 14 bees in the hive and 17 bees in the garden.

  How many bees are there in all? $14+17= ?$ 14

                                             +17

                                            ?

- Find the sums of three 2-digit numbers
- Find the sums of four 2-digit numbers
- Addition word problems with 2-digit numbers
