

Введение

Визуализация в обучении позволяет решить целый ряд педагогических задач: обеспечение интенсификации обучения, активизации учебной и познавательной деятельности, формирование и развитие критического и визуального мышления, зрительного восприятия, образного представления знаний и учебных действий, передачи знаний и распознавания образов, повышения визуальной грамотности и визуальной культуры. Методически грамотный подход к визуализации обеспечивает и поддерживает переход обучающегося на более высокий уровень познавательной деятельности, стимулирует креативный подход. Современные технологии позволяют решать задачи переноса образовательной информации (телекоммуникации, дистанционное образование и др.), формирования умений и навыков (компьютерные виртуальные практикумы и тренажеры и пр.), автоматизированного контроля знаний.

Использование приёмов визуализации позволяет активизировать познавательную активность учащихся на уроках английского языка, развивать визуальное мышление. Урок становится более ярким и интересным, активизируется учебная деятельность подростков.

Настольные игры на английском языке — один из наиболее простых способов вовлечь учащихся в устную коммуникацию, и повысить мотивацию к изучению иностранного языка.

В данном пособии все настольные игры были составлены с учетом национального компонента, так как понимание иной культуры возможно только на основе знания своего региона. Под национальным компонентом следует понимать систематическое и последовательное включение в общеобразовательный курс иностранного языка местного языкового материала, как в тематическом отношении, так и в отношении сугубо лингвистическом. Отсутствие таких знаний является причиной недопонимания, источником конфликтов и кризисов в процессе межкультурной коммуникации. Культуроведческая осведомлённость необходима для верной интерпретации того, что происходит в конкретной ситуации в инокультурной среде. Незнание социокультурного контекста и отсутствие стратегий по восполнению информационных пробелов могут оказаться решающими факторами при коммуникации с носителями языка и культуры.

Усиление культуроведческого компонента в обучении, особенно на начальном этапе практического овладения языковыми формами как средством общения (т.е. коммуникативного компонента, позволяет реализовать принцип коммуникативной направленности и организовать заинтересованное общение и взаимодействие детей на новом для них языке.

Использование национального компонента, создает специальную речевую среду, которая помогает учащимся сблизиться с историей родного края, а также с его политическим и географическим положением, а эти познания помогают учащимся усвоить не только страноведческий, но и исторический материал изучаемого иностранного языка.
