

Problem: Nouns DAO sponsored a lot of clients/websites/tools before, but when the funding ends, some of them just stop working.

Solution: We want more Nouns DAO sponsored clients/websites running on ENS + IPFS

Protocol Labs is hosting a [hackathon](#) globally at the end of this month. (May 29 - June 30, 2025)

We plan to run a track for NounsDAO & ENS

Goal: Invite devs in NounsDAO & IPFS community to tune and put their frontend on IPFS and bind with an ENS domain name.

Funding:

Protocol Labs: 200k

Nouns: 2~3ETH

ENS: 3-5k ?
