

*Dissonance Weapons Works On Basically Every Single Enemy In The Game,
Including Inorganic Enemies Such As The RoboButlers.*

*Comparing Robobutlers To Their Counterparts, [The Liftbots](#), It Appears That
They Are Made Of Steel Or Some Other Substance Related To Steel.*

Hank (Blue) Is 6'2 Or 187.96 cm [As Stated By Krinkels](#). In This Shot He's 304 Pixels Tall, While The Top Part Of The Weird Wood Thing (Red) Is 178 Pixels. Meaning The Top Part Of The Wood Thingy Is 110.1 cm.

Wood Thing (Still Red) Is 181 Pixels.

RoboButler's Height (Blue) Is 334 Pixels, So 203.167955799 cm

RoboButler's Length (Green) Is 128 Pixels, So 77.8607734797 cm

Wood Thing (Still Still Red) Is 146 Pixels.

RoboButler's Width (Pink) Is 85 Pixels, So 51.7044198889 cm

Now, We Can Find The cm^3 Of Our Little Robot Boy.

$$203.167955799 \times 77.8607734797 \times 51.7044198889 = 817902.610755 \text{ cm}^3$$

Atomization of Steel: 59526.65 per cm^3

$$59526.65 \times 817902.610755 = 48687002444.5 \text{ Joules or 11.6 Tons of TNT}$$
