

How were my distractions affecting our classroom atmosphere and our learning today?

Put a tally mark where you think it belongs when you are given the signal that you are distracting either other classmates or your teacher.

blurting out / noise that attracts attention	talking over a peer or the teacher or continued talking, when asked to be quiet
placing blame on another student in order to deflect from misbehavior being addressed	not following directions (off task), or arguing about or ignoring specific teacher directions
making purposeful noises or actions that are disruptive (tapping, crashes, repeated sounds on purpose)	not keeping hands to self / throwing something / breaking something

____ tally marks in one day means you fill out a think-about-it. One more, and this goes home to be signed by a parent, as well.

____ I understand that is is my teacher's job to help me and other classmates learn. These specific behaviors will hinder our learning, so I am using this to monitor and lessen these distracting behaviors.
I am sharing this with a parent so he or she can help me understand why these behaviors are not helpful to the classroom as a whole, as well.
