

How to Find Available Domain Names, Fast

Go to [ChatGPT](#) and enter a prompt like this:

Give me 50 short and catchy domains for the [ENTER YOUR NICHE] niche. Include both the hyphenated and non-hyphenated version for each name. Do not include numbers or bullet points before the names. Do not include slashes / or other symbols. Do not use any formatting like bold. Do not include the ".tld" in the end. Do not add any more text before or after the list. Show one domain idea per line.

ChatGPT will then give you a list that may look something like this:

SlimDown

Slim-Down

FitQuest

Fit-Quest

LeanLife

Lean-Life

TrimTrend

Trim-Trend

WeightAway

Weight-Away

PoundShed

Pound-Shed

ShapeShift

Shape-Shift

Generate

Note: We like to use domain extensions that are affordable to both register AND renew. Some extensions can be had for a couple of bucks, but renew at \$30+ per year. Some of our favorite domain extensions with affordable renewal rates include: .com, .net, .org, .xyz. Feel free to use more of your favorite domain extensions if you want.

Click the "Generate" button and you'll get a list of catchy, available and affordable domain names. You can add as many as you want in your cart, and register them.

Or, you can just use the tool above to find a great name, and then register it with your favorite domain registrar.
