

PSAM Assignment 3 - My Class Website is a Shifting House...

Drawing on Laurel Schwulst's essay [*My website is a shifting house next to a river of knowledge. What could yours be?*](#), for this assignment we are going to reimagine our class website.

Part I : The References

Go to the shared [Google Photos folder](#) of graphic design references. Pick 10 of them and save to the REFERENCES folder. They can be purely aesthetic, they can be for color reference, they can be inspiration for layout—what and why you pick is up to you.

Part II : The Design

Using the shared Sketch file create a new design for the home page of the site. You can change anything about the site that you want: the layout, the typefaces. Go crazy. How far can you push the design until you break its legibility? Feel free to submit 1-3 designs but only 1 will be required.

If you want to add background video or GIFs save those to a separate folder within your assignment folder and include a still or screenshot in your layout.

If you are using new fonts, make sure that you include those font files in the FONTS folder.

DUE

Next class, Thursday March 7
