
STEPPING INTO FINANCIAL FREEDOM WITH CONFIDENCE AND CLASS

Presented by Printers Financial Consulting LLC

Welcome!

At Printers Financial Consulting LLC, we believe that every family deserves to build wealth that lasts for generations. This guide walks you through simple, powerful steps you can take to start building financial freedom—starting with the right foundation: life insurance.

Step 1: Build a Solid Foundation with Life Insurance

Life insurance is not just about protection—it's about legacy. It ensures that your loved ones are financially secure if something happens to you. But it can also serve as a wealth-building tool through permanent policies with cash value.

Step 2: Teach Your Children Wealth Principles by Age

Elementary School (Ages 5–10)

- Read kid-friendly books about money and saving.
- Use a clear piggy bank or jars labeled: Save, Spend, Give.
- Teach the value of earning (e.g., chores for allowance).

Middle School (Ages 11–13)

- Set up a regular allowance and teach budgeting basics.
- Introduce a savings account at your local bank.
- Let them help with small financial decisions.

High School (Ages 14–18)

- Add your teen as an authorized user on a credit card.
- Show them how to track expenses and credit scores.
- Encourage part-time work and saving a portion of earnings.
- Discuss entrepreneurship, investing, and passive income.

Final Tips to Build Generational Wealth

- Create a family vision board around money and goals.
- Start a family emergency fund.
- Set up a trust or will to protect your legacy.
- Talk about money openly and regularly at home.

Take the Next Step

You're not alone on this journey. At Printers Financial Consulting LLC, we help families set up protection plans, create wealth strategies, and build legacies with confidence and class.
