WEEK OF THE BEAST LORDS

WOOLIE

38:31 Demon's souls~! Pat beat it twice. Also, woolie picked up a PS5!

- 40:02 woolie encountered the GPU glitch

- 42:08 reminder not to put it into rest mode because of bricking issues. And some controller issues that seem to stem from how many wireless signals woolie has in his apartment

- 44:27 woolie's new TV, a shoutout to displaylag . com, and OLEDs being a bad idea as a computer monitor due to burn in

- - 47:43 variable refresh rate

- - 48:40 so demons souls- wait, first, check out how thin this TV is! The wii sensor bar wont even sit on top of it!

- 51:47 sitting at 2-1 in demon's souls

- 53:25 each zone giving you something that helps you in other zones, and woolie is actually at 2-2

- 55:00 thinking how reggie would run this, and pulling up a wiki
 - 56:03 world tendency and playing without messing around with it
 - 56:55 is it still nigh impossible to max upgrade a weapon in a single run? No
 - 58:55 is obtaining pure white tendency still as hard as it used to be? Also no. AND the advantage to playing in pure black tendency
 - 1:01:28 how to get it toward pure white
 - 1:02:52 world tendency is an incredibly complex system, with the changed icons making it even more confusing
 - 1:04:06 woolie isn't going to sweat missing content, but he will try to get ostrava's plot line. And ostrava's drop
 - 1:06:13 what causes items to appear behind you in the nexus?
 - 1:06:40 better load times and all the color letting one see better. The swamp is now a bit more visible
 - 1:08:56 messaging bugs and stuff with messages. Also, photo mode. If you are invaded it will kick you out of photo mode. Photo mode being busted and will probably never be in a proper souls game
 - 1:11:14 pat is starting to understand plague on slower gameplay, given the difference between demon's souls and dark souls 3/bloodborne. Parrying and backstabbing being broken.
 - 1:14:57 pat speculates elden ring will paly like sekiro
 - 1:15:43 demons souls feels more like a sequel due to how many different ideas are in it
 - 1:16:40 enjoying the revisit to souls
 - 1:17:24 so, how about that HAPTIC FEEDBACK? Great. Woolie's non-issues: reversing the menu shortcuts and accidentally hitting the mute button. Pat on the mute button and it recording your voice when you get a trophy.
 - 1:20:28 wanting an option to change button press options, and what the power button on the console does. Woolie also misses themes
- 1:21:33 Brand new toy~ Mario Kart live home tour! An RC kart where you can setup a track around your house.

- 1:23:32 downside: can't let it go 5 feet away from the switch
- - 1:25:37 solving the problem by buying 120 feet of HDMI cable. Going black friday weekend
- 1:27:00 setting up the track, and the tragic saga of reggie the salty on time trials

1:28:33 Did some vergil bloody palace on DMCVSE, got to floor 62

- 1:30:06 vergil is a bit miserable in LDK before getting some of his moves, LDK seemingly made for him due to his screen clears

- - 1:44:18 pat brings up a story of dog diarrhea, and woolie recommends if you want to ruin your day, look up hippo farts. Why is the auto complete explosion?!

- 1:45:50 woolie apologizes GXgrain son for this horrible tangent when talking about his game. Its based on hyper hitboxing, with lots of fun groundbased footsies, similar to a little mac mirror match

- 1:48:05 there's 12 characters now, and hyper hitboxer is in. Various archetypes stripped down to their essentials

- 1:50:08 seems like its going for a huge roster
- 1:50:50 yoga catastrophe or tiger genocide for best move name? And jaguar revolver
- 1:52:58 nicknames for your dick but its a fighting game move

1:55:33 revisiting fate/unlimited codes

- 1:58:06 the F/UC lore, that woolie doesnt care about
- 1:58:50 how woolie learned about it
- 2:01:31 a jank, busted, but very fun game. The legends of old resurrect themselves to blow woolie up on stream
- 2:03:14 the unique way archer plays
- 2:05:19 so, time to start figuring out how japanese kids turn into black men, huh? And then that'll drag you down to pulling the lever for the gacha.
- 2:06:34 woolie preferring admiring it from behind a stick. And just that far.
- 2:08:09 Don't you know the deepest lore, pat? If they use a sword, they're an archer.
- 2:10:04 woolie does indeed love bazett. As expected. Pats metric for determing if something should continue to exist: is there a german suplex? Yes. And a sky high rider justice bomb.
- 2:11:37 woolie goes down a wikipedia list of fate entries
- 2:14:07 WhAt ShoULD I StaRT WiTh. Woolie managed to figure out a decent order.
- 2:16:37 Pat: I would watch FLCL 198 times before reading a VN. and FGO arcade. ONORE ARKEIDOOOO

- 2:20:11 fate blew up a lot...
- 2:22:25 Pat gets an answer: Avalon keeps him alive when he should have died
- 2:24:24 character select spoilers
- 2:25:22 Go check out woolie over on woolieversus on twitch, twitter, and youtube! Finished infinite warfare! The robot buddy in that game is a top tier bro. Time to begin yakuza 0 and finishing mario galaxy with some more 13 sentinels too! Word of warning: yakuza 0 starts really slow.

PAT

2:27:10 pat was on two other podcasts this week, one of them was the kojima frequency! The possibility of an MGS1 remake and how f'ed up policemen is

2:39:05 Spider-man: Miles morales! Do you feel the swagger of a black teen? And that video pat posted where a cop just walked up and pointed a gun at miles' face. Pat finished the game 100%. Just as good as spider-man

- 2:40:58 the new peter head looks bad

- 2:41:42 only thing pat dislikes is the name of the electricity powers, venom. Confusion with the venom symbiote

- 2:44:03 police are a background element here compared to the first game. A before and after of public perception. Cops can FEEL the swagger!

- - 2:46:47 that time when peter was in court and said jonah only hates him because he's black. And a reference to a movie no one has apparently seen, a time to kill

- 2:49:11 taskmaster missions, and pats take is he needs his own game because then people would complain when he takes up 50% of the game in the sequel

- 2:51:10 people IRL complaining about replacing spider-man. And pat wants italian spider-man in spiderverse. Remember when spiderman invented tokusatsu?

2:53:47 SPONSOR: DOORDASH. Whens the 60\$ little bit of everything on the menu option?

3:01:14 SPONSOR 2: MANSCAPED. Become as orbs

3:10:21 the difficulty curve according to pat: A normal difficulty incline until the end where it goes straight up

- 3:11:36 By comparison, Pat hit a wall in the witness

- 3:12:42 2mello is on the soundtrack!

- 3:13:18 woolie is terrified of giant things crushing him. Pat recommend not playing militsioner
