- Water bottle
- Miscellaneous snacks
- Backup Peanut Butter (For Sisnina)
- 2 lb's of vearth
- 2 arm sleeves
- Bag of Harpy Candy

Future Stuff

- Harp

More About Shelly!

- Shelly is a [Turtle Shell](#) backpack made through the [Combined Efforts](#) of the amazing engineer Zee and the incredible scientist Walvia!
- Shelly has a beautiful bright green (and blue) shell with a silver coloured backpack inside/underneath.
- Shelly is super nice and fits snugly enough that it doesn't stop Sylvia from being able to run really fast!

Super Features:

- Lightweight design!
 - Having pockets filled with a gas even lighter than helium, the backpack practically floats, even with the solid turtle shell attached to it!
- Useable in the dark!
 - Tubes filled with neon lining the inside of the main pocket light up when its dark outside, allowing easy access even in the darkest locations.
 - Glows a light purple!
- Easy dial access!
 - Quick access dial slots allow easy storage of the versatile tools!
- Breathable Design!
 - Fit with an air tank, Shelly is even able to be used in space/under water!
- Fighting capabilities!
 - Equipped with a graviton emitter, Shelly is able to provide gravitron armour around Sylvia's limbs (usually her legs) in order to protect her as she kicks people really hard.
 - Glows purple (same colour as the neon lighting).
 - Activated by a switch on the straps
 - Turtle shells are really tough!
