Introduction:

A quick guide to formatting pie charts and data labels in Excel.

Learning Objectives: Learners will be able to:

- Create and apply formatting to a pie chart in Excel.
- Identify 3 reasons to present data using a pie charts

Outline:

- Introduction
- Walkthrough on how to create and format parts of a pie chart
- Reasons to apply formatting to charts

Notes:

Background music is set to 10% - Tuesday Vibes (from Camtasia content library.)

2. Excel Spreadsheet Recording			
Visuals/Graphic	Script/Audio	Programming/Animation Notes	Comments
Screen recording of Excel	To start, you need to identify the data you	Arrows transition to the next slide	
Spreadsheet.	need to use to create your pie chart. I		
	want to show total sales for the year. To do	Zoom in and use spotlight	
Sketch Motion circling ranges	this, you need to select the range A3:A8	animation when selecting the	
A3:A8 and F3:F8 on screen	and F3:F8, which are non-adjacent, or not	ranges A3:A8 and F3:F8 on screen	
recording.	directly in contact with one another. To do	recording.	
	this, I will click on cell A3, hold my mouse		
Callout: Click & hold ctrl key	down and drag it to A8 and release the	Zoom in when showing Insert Tab.	
	mouse. Then click on Control on your		
Sketch Motion circling Insert Tab	keyboard (hold it down), and as you are	Zoom in and use spotlight	
	holding down control, select the range	animation when showing the chart	
Sketch Motion circling Chart	F3:F8. You have now selected 2	formatting buttons.	
Design Tab	non-adjacent ranges. Then click on the		
	Insert tab, find the Charts group, and click	Zoom in when showing the Add	
Sketch Motion circling Format	on the Pie Chart icon. I will choose the 2-D	Chart Elements drop down – Data	
Data Series Pane on right	Pie chart. This chart is plain looking, so I	Labels	
	want to make some changes so that the		
Sketch Motion circling Point	information is better communicated to my	Zoom in when showing to do the	
Explosion on the Format Data	audience. You can use the chart formatting	Point Explosion on the Format Data	
Series Pane.	buttons, located to the right of the chart,	Point pane	
	to add elements to your chart, change the		
	style, or filter the data visible on the chart.		
	You can also use the Chart Design tab at		
	the top (this will only be visible when your		
	chart is selected). I am going to click on		
	Add Chart Elements on the Chart Design		

2. Excel Spreadsheet Record	ing		
Visuals/Graphic	Script/Audio	Programming/Animation Notes	Comments
	Ribbon, hover my mouse over data labels,		
	and choose the type of label I would like. I		
	am going to go with the outside end data		
	label. This shows us the actual dollar		
	amount in sales for each person. I also		
	want the salesperson with the highest		
	sales to stand out in the chart. To make it		
	stand out, I am going to add an		
	"explosion" to the piece of the pie that is		
	the largest. To do this, double click on the		
	data series to open the Format Data Point		
	pane on the right side of the screen. Now, I		
	need to click on the largest pie piece,		
	notice when I click on the pie piece, I want		
	to make changes to, you can see the blue		
	circles only around that one piece, which		
	means that is the only one selected. Then		
	go to the Format Data Point pane and		
	change the percentage.		
	Making these changes to the data labels		
	and using the Format Data Point pane, will		
	help to visually communicate information		
I	to your audience.		

3. When to use Pie Charts

Background – Image of a pie chart	When should you use pie charts to visually represent data?-	Arrows transition to begin video	
	When you want to show a comparison of	Arrows transition to the next slide	
Callout: When to use Pie Charts	data as parts of the whole.		

Arrow Callout: Comparing data as part of the whole. Arrow Callout: Showing a small amount of data. Arrow Callout: Using only one series of data.	 They are best for showing a small amount of data; too many pieces will be hard to see in a pie chart. When using only one series of data, as pie charts do not have a horizontal or vertical axis like column or line charts. 	Add animation to ALL of the callouts so the come in and leave with the audio.	
Callout: Specific Examples Arrow Callout: Analyzing data — Comparing sales totals for a team. Arrow Callout: Showing composition or distribution of a variable — Budget allocation of a project.	 Here are some specific examples of when you may want to use a pie chart: Analyzing data – For example, comparing sales totals for a team of people Show the composition or distribution of a variable – for example a budget allocation of a project, or the preferences of a survey group.
