ABSTRACT

The abstract contains a brief description of the problems and objectives of service to the community, methods used, and results of community service. The pressure of abstract writing is mainly on the results of community service. Abstract written in English. Abstract typing is done with single spaces and a narrower margin than the right and left margins of the main text. Keywords should be included to illustrate the realm of service issues and the main terms that underlie the implementation of community service. Keywords can be single words or combined words. The number of keywords is 3-5 words. These keywords are necessary for computerisation. Title search Community service and its abstract made easy with the aforementioned keywords. The maximum number of words in an abstract is 250 words.

[The word count is Min = 3000 words Max = 5000 words, the paper size is A4, and it uses 1.15 spaces]

Introduction

This section contains the background or context of the research, research problems, research solution plans, research objectives, summary of theoretical studies related to the research problem, and hypotheses (if any).

The subtitle is centered in capital letters at the beginning of each word except for conjunctions (Times New Roman 12, bold). For sub-headings, it is written left-aligned with capital letters at the beginning of each word except for connecting words. For the third level subtitle, it is written in capital letters and in bold, only at the beginning of the sentence, and so on.

Method

Contains the type and research design, research variables, population and research samples, data collection methods, data analysis methods (can be adapted to the research approach used, quantitative or qualitative).

Results and Discussion

The results and discussion are adjusted to the research approach. If the quantitative research approach consists of descriptive statistics, the results of the assumption test and the results of hypothesis testing are then analyzed critically. If the qualitative approach is in the form of themes from the results of the qualitative analysis carried out.

Tables, Figures and Formulas

Each table or figure is given a serial number, title, according to the contents of the table and figure, and the source of the citation if any. The source of the citation is written under the table or figure, Times New Roman font size 10. The title of the table is written above the table and the title of the figure is written below the figure. Formulas are created using the Equation feature in Microsoft Word.

Example table:

Table 1 (table number)
Measuring Instrument Validity and Reliability (table caption, Title Case, italicized)

Variable	F	Significance
Religiosity*Morality	79,698	p<0.01
Religiosity*Morality	37,700	p<0.01

Sample image:

Figure 1 (image no.). Image caption (Sentence case)

Conclusion

The content of the conclusion is the answer to the research objectives, not a summary of the research results. Conclusions and suggestions are made in a concise, clear and concise manner based on the results and discussion.

Declarations

Author contribution. The contribution or credit of the author must be stated in this section.

Funding statement. The funding agency should be written in full, followed by the grant number in square brackets and year.

Conflict of interest. The authors declare no conflict of interest.

Additional information. No additional information is available for this paper.
