MOTHER: DECEASED

SISTER: ALIVE

BACKGROUND

Before Corz Niflhel became part of the SCP Foundation, he lived a regular life. Born on April 9th, 1999, in Malmö Sweden, he grew up with his parents and older sister. Corz always found the human body interesting and he loved learning about how it works and always had questions.

After school Corz decided to become a nurse. But not just any nurse he wanted to help kids at a school. His friends and family thought it was an interesting choice, but Corz knew it was what he wanted to do. He believed helping others was the biggest priority.

Working as a school nurse was great for Corz. It calmed him down but He was also good at his job and liked helping students when they were sick or hurt. He also taught them about staying healthy. The teachers at the school thought he was amazing because he knew so much about medicine and biology.

Even after finishing school, Corz kept learning about medicine. He read a lot of books and wanted to know everything about the human body. Corz thought the more he knew, the better he could help people.

One day, something happened. The SCP Foundation that deals with strange anomalies, noticed how smart Corz was about medicine. They thought he could help them with their work, so they asked him to join them.

Corz was surprised but excited by the offer. He had never heard of the SCP Foundation before, but he liked the idea of using his skills to solve mysteries and keep people safe. So, he said yes.
