ABSTRACT

A properly constructed and informative abstract is helpful for the initial editorial review of the submitted manuscript. Review articles, special articles, and reports should include an unstructured abstract that states the purpose of the article and emphasizes the major concepts and conclusions. Original research articles must include a structured abstract written in complete sentences, consisting of no more than 150-200 words.

Keywords: keyword1; keyword2; keyword3; keyword4; keyword5

1. INTRODUCTION

The first section of the paper is usually the introduction, in which the background, research topic, and objectives of the study are described. The main results and principal conclusions should also be briefly highlighted in this section.

2. LITERATURE REVIEW

This section should contain a discussion of relevant theories and previous studies. The novelty of the research should be clearly highlighted. Citations must follow the IEEE citation format, such as [1] and [2]. Ensure that the discussion demonstrates clarity, originality, and scientific contribution.

3. METHODOLOGY

This section should explain the research design, data collection procedures, research variables, and analysis methods used in the study. Citations should follow the IEEE citation format, such as [1] and [2]. Ensure that the methodology demonstrates clarity, originality, and scientific contribution. Please use the styles and formats defined in this manuscript for titles, text, figures, and tables. Specific examples are provided as follows.

3.1. Subsection

3.1.1. Sub subsection

3.2. Figures and Tables

Figures, schemes, and charts, along with their captions, should be placed in the text where they are first mentioned and numbered consecutively using Arabic numerals. In addition, the figure caption should be placed below the image.

Figure 1. If there are multiple panels, please provide a detailed description: (a) description of what is contained in the first panel; (b) description of what is contained in the second panel. A caption written on a single line should be centered. Reproduced with permission from [Ref.]. Copyright © Year, Publisher.

A permission statement is required for all figures reproduced or adapted from previously published articles or sources. Content published under a CC-BY license may be used without requesting permission, provided that the source is properly attributed, for example: “Reproduced under the terms of the CC-BY license [Ref.]. Copyright © Year, The Authors, published by [Publisher].” However, permission must be obtained for the reproduction of content published under CC-BY-NC, CC-BY-ND, or CC-BY-SA licenses. Delete this statement if it is not applicable.

Table 1. Tables should be placed in the main text near to the first time they are cited.

Title 1	Title 2	Title 3
entry 1	data	data
entry 1	data	data

Tables may have a footer.

3.3. Formatting of Mathematical Components

The authors are encouraged to use either the Microsoft Equation Editor or the Math Type add-on (<http://www.mathtype.com>) for equations. This is an example of an equation:

$$Ax=b$$

4. RESULTS AND DISCUSSION

This section should present the research results clearly. The findings should be compared with previous studies and their implications should be explained. Citations must follow the IEEE citation format, such as [1] and [2]. Ensure that the discussion demonstrates clarity, originality, and scientific contribution.

5. CONCLUSION

This section should summarize the research findings, contributions, limitations, and directions for future research. Citations must follow the IEEE citation format, such as [1] and [2]. Ensure that the discussion demonstrates clarity, originality, and scientific contribution.

ACKNOWLEDGMENT

Generally, the last paragraph of the paper is used to acknowledge individuals, organizations, and sources of financial support. You may also state grant numbers and sponsors in this section.

CONFLICTS OF INTEREST

Authors must declare any conflicts of interest or state: “The authors declare no conflict of interest.” Authors should identify and disclose any personal circumstances or interests that may be perceived as inappropriately influencing the representation or interpretation of the reported research results. Any role of the funders in the design of the study; in the collection, analysis, or interpretation of data; in the writing of the manuscript; or in the decision to publish the results must be declared in this section. If the funders had no such role, please state: “The funders had no role in the design of the study; in the collection, analysis, or interpretation of data; in the writing of the manuscript; or in the decision to publish the results.”

REFERENCES

References must be numbered in the order in which they appear in the text (including citations in tables and figure legends) and listed individually at the end of the manuscript. We recommend preparing references using bibliography management software such as Mendeley, EndNote, Reference Manager, or Zotero to avoid typing errors and duplicate references. Include the Digital Object Identifier (DOI) for all references where available.

Citations and references in supplementary files are permitted, provided that they also appear in the reference list of the main manuscript.

In the text, reference numbers should be placed in square brackets [] and positioned before the punctuation; for example, [1], [1–3], or [1,3]. For embedded citations in the text with page numbers, use both brackets and parentheses to indicate the reference number and the page numbers; for example, [5] (p. 10) or [6] (pp. 101–105).
